XV.IV UMBRA

Our XV.IV Umbra is a masterfully crafted grey-based slab that embodies timeless elegance and refined beauty. Its captivating surface is adorned with delicate and graceful white veins that meander effortlessly, creating a harmonious dance of light and shadow.

The subtle interplay of grey and white hues exudes a sense of sophistication and tranquility, making it the perfect choice for those seeking a serene and luxurious ambiance. With its impeccable craftsmanship and understated allure, XV.IV Umbra promises to elevate any space to new heights of elegance and style. Choose between a polished or natural finish to customize the aesthetic appeal of XV.IV Umbra and create a space that perfectly aligns with your design vision.

ADVANTAGES

NATURAL STONE AESTHETIC

Our porcelain resembles the look and feel of natural marble, with none of the hassle. Our collection contains 14 different colours with several finishes and a wide range of patterns available to suit any project.

HIGHLY SCRATCH RESISTANT

Porcelain is close to being completely indestructible. However, the material is not impossible to scratch. We strongly suggest not dragging any heavy items like ceramic pots over your porcelain surfaces and to clean any sandy grit when spotted.

STAIN RESISTANT

No surface is 100% stain-proof but porcelain comes very close. Being a non-porous material, liquids are unable to penetrate into the surface. The rare stain is on the surface only and easily cleaned off with soap and warm water.

IMPACT RESISTANT

Porcelain is an extremely strong material ideal for workspaces, home design and high traffic atmospheres such as hotels, shops and restaurants.

RESISTANT TO ICE & FROST

Our porcelain is ideal to use in environments that reach below freezing temperatures. Due to the immense strength and absorbent qualities of these slabs they are impossible for snow or ice to penetrate and crack due to the cold.

RESISTANT TO ULTRA VIOLET RAYS

Our porcelain will not fade or change colour if exposed to direct natural sunlight. The glazes that are used during the manufacturing process strengthen the stone and permanently lock the pigment into the stone.

HEAT RESISTANT

Our porcelain slabs are fired in a kiln at extremely high temperatures, making them incredibly heat resistant. Any heat near/on the slab will not damage, crack, or discolour the slab - making porcelain the perfect choice for fireplace designs!

UNIQUE BENDING STRENGTH

Porcelain slabs carry a unique quality that makes them possible to bend with the correct tools and techniques. This makes design possibilities truly endless.

APPLICATIONS

Interior Applications:

- Countertops
- Vanities
- Shower walls and floors
- Bathtub surrounds
- Fireplace surrounds
- Flooring
- Stair treads
- Wall cladding
- Backsplashes
- Tabletops

- Driveways
- Walkways
- Stairs
- Facades
- Roofing
- Siding
- Garden paths
- Outdoor kitchens
- Wall cladding
- Fountains and water features
- BBQ islands

MAINTENANCE

Trusted worldwide for their incredible low-maintenance qualities, porcelain slabs are perfect for busy households, commercial spaces, and high-traffic areas. Requiring little to no maintenance to keep your surfaces looking brand new for years to come. They are highly durable, long-lasting, and require very little upkeep, making them an excellent investment for any project.

FABRICATION

The fabrication process of porcelain slabs for interior and exterior applications involves specialized machinery designed to handle the unique properties of the material. We have established partnerships with trusted fabricators in various areas around the GTA. These fabricators possess the expertise and equipment necessary to precisely cut and shape the porcelain slabs according to your project's specifications.

We can guide and connect you with trusted fabricators, ensuring that your porcelain slabs are fabricated with the utmost care and precision, resulting in stunning finished products that exceed your expectations.
