Post Screw

1 Innovative wafer head with TX drive

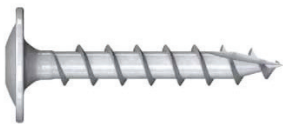

2 High efficiency coarse thread with RUSPERT® coating

3 Immediate start due to self drilling cutting point

TECHNICAL DATA

AnchorMark Post Screws

Art. No. [Ruspert Coated]	Diameter [mm]	Length [mm]	Drive	Head Type	Qty [pce]
659008040	8.0	40	TX 40	Wafer head	100
659008050		50		Wafer head	100
659010040	10.0	40		Wafer head	100
659010050		50		Wafer head	100

The advantages of this screw are:

- The TX head allows for excellent power transmission and no slipping
- The coarse thread allows for high load-bearing capacity
- **RUSPERT®** coating reduces the frictional resistance when screwing in and provides excellent corrosion protection
- Suitable for gardening, landscaping, and wood constructions

1) The innovative wafer head with TX drive allows for excellent power transmission, a secure hold, and high contact pressure

2) The coarse thread allows for high load-bearing capacity

3) The cutting point allows for an immediate screw start

Pre-drilling may be necessary depending on the wood quality and application scenario
