WIRING DIAGRAM

DIMENSION

INSTALLATION

This unit is DIY compatible, however if wiring involved, MUST be completed by a qualified electrical contractor

1. Installation for the controller:

Fix the controller at the designated location using the 3M tape.

2. Connection and installation for the LED Strip:

Peel the 3M tape on the end of the male pin on the side of connecting LED strip (Peel 10cm long);

Connect the strip to the controller with male and female plug; Fix the strip with tearing off the 3M tape on the backside.

3. Connect the power supply with the controller.

4. Plug into the power point and turn on the power.

FUNCTION DIAGRAM

APP FUNCTION

- Remote Control: can be controlled anywhere
- Timer Function: Set the timer to turn on and turn off the strip via Tuya Smart approved gateway.
- Intelligent Scene: The system sets a variety of intelligent scenes, and different scenes correspond to different lighting atmospheres.
- Group: Group is available (only for the same type of product).
- Device Sharing: The device is shared with other user control devices in the home.

DIY SET UP

Download APP

- Search "TuyaSmart" from App store or Google Play.

- Scan the QR Code from the label or user manual.

The App is compatible with Android 4.0 and iOS 8.1 and higher versions.

Sign up a new account or log in with an existing account.

Connection:

- Turn the Bluetooth in your phone, open the main interface of the APP and turn on the LED Strip;
- The App will pop up tips with "Devices to be added"; Or choose to "Add device";
- Go to "Add Manually", Click "Lighting", Select "Strip Light (Wi-Fi)";
 - Make sure the light has already been flashing;
 - if the strip does not flash.
Turn on and turn off the power for 3 times, the strip will flash.
- Select 2.4Ghz Wi-Fi Network and enter password, waiting until pairing success (make sure your mobile and the smart devices are in the same Wi-Fi network);
- Then go to the interface of "Scanning devices", after scanning success and choose "next" to go into operation modes.

1. For Use without APP Control and only using Remote.

- Turn LED Driver On
- LED Strip will automatically go into Sync mode for APP Control, Allow LED Strip to flash for approximately 3 Minutes.
- Once Flashing stops and LED strip is in white static mode, Remote control will now be able to be used.
