

BALANCING ACTS

ROCK STACKS:

Try balancing
piles of rocks
like these ...

They can be all
shapes and sizes.

SEE-SAW:

Balance a stick on a tall rock and play see-saw with it using rocks to make it level or tilted.

SCALES

Try hanging rocks from the stick, making it both level and tilted.

NOTE: Feel free to use stacked rocks instead of a single tall one and practice your stacking.

Put it all together
and you have a
figure in perfect
balance.

To put the figure
in dynamic action,
just kick away the
support.

Note the effect
this has on all the
other rocks.

Practice balancing figures from the ground up, just like with the rocks.

REMEMBER: To put the figure in dynamic action, kick away the support.

Good Luck!
