

RING SIZING GUIDE

As an online jewellery store, we understand how you might feel intimidated when purchasing your new ring given that you can't physically try it on. We hope that selecting the correct ring size with the help of this guide will make the process a little less daunting!

The best way to get accurately sized would be to visit your local jewellery store, but if this is not an option, we suggest using the method below. When executed properly this method can determine your correct ring size fairly accurately.

STEP 1:

Before you print this sizing guide, please check your print settings and make sure that the page scale is set to "None" in your printer dialogue box.

STEP 2:

Please make sure the bar below is measuring at exactly 30mm in length to ensure accuracy.

STEP 3:

Place a ring that fits the finger in question on the circles below. For a proper fit make sure that the black circle is visible within your ring. That will be your ring size.

To double-check, place your ring on the next larger size and you should not see the entire black circle.

Unfortunately, we don't stock rings in half sizes. If you are between sizes, our recommendation is to size down to the nearest full size. For example, if you are a 7.5, size down to a size 7.
