CARE & MAINTENANCE GENERAL TIPS

Pravada Floors fine products are especially designed to endure wear resulting of normal use for many years. While we ensure that we manufacture the highest quality flooring for you and stand behind our products by offering you a 35-year limited residential warranty [for terms and conditions, please refer to Warranty guidelines], you are solely responsible for maintaining and caring for your floors to ensure that they will remain beautiful for the long term. Please read below a few general tips on how to keep your floors looking their best.

CLEANING & CARE

- Clean the flooring at regular intervals with vacuum cleaner or dry mop.
- Alternatively, use the synthetic detergent and a well wring damp cloth.
- Avoid using large amounts of water. Wet spillage must be dried immediately.

PROTECTION FROM SCRATCHES

- Carpets in entrance areas will protect sand and dirt.
- Felt pads should be fitted to furniture legs to avoid marking.

HUMIDITY AND ROOM TEMPERATURES

- A room's relative air humidity is ideally 40-50% at 20°C (68° F).
- During cold periods with increased heating, the indoor air humidity may become so low that the floor is prone to drying out. This may cause a certain amount of separations so that minor gaps appear in the flooring joints. Such problems can be overcome by using a room humidifier.
