- Eliminate costly errors

DataBridge™ SS Scale House Software

Features and Benefits

General

Scenarios	Full-length weighing for one-pass and two-pass transactions.
Scales	Supports up to two scales plus a manual scale.
Terminals	Connect to weigh terminals from METTLER TOLEDO, as well as other providers.
Database	Optimized Microsoft SQL Server 2008 R2 Express database loads data quickly.
Current Technology	State-of-the-art technology is compatible with current Windows Pro operating system.
Approvals	Legally approved software with NTEP and OIML Certification.
Role-based Security	Specify each user's access level with two security roles: Operator and Configurator.

Simpler Processing

Easy Installation	Get started quickly and easily with installation and activation wizards.
Interactive Training	Watch 3–5 minute videos to learn how to use the system, step by step.
Touch-screen Friendly	Transaction processing is effortless with touch-capable weigh screen.
Grid Controls	Sort, filter, group and print lists effortlessly with drag-and-drop table controls.
Multilingual	Change languages with a single click. (English, Français, Español, Deutsch, Nederlands, Svenska and Norsk)

Better Organization

Transaction Data	Organize customer, vehicle, product and tax information for simple selection and editing.
Custom Data	Track up to three custom data sets. For example: driver name, origin, destination, etc.
Quick-Add Functionality	Quickly add new vehicles during a transaction—right from weigh screen.
Import/Export	Reduce manual labor and paperwork by importing data and exporting daily transactions.
Standard Pricing	Price materials either by weight or load.
Contract Pricing	Set customer-specific pricing or job contract with an expiration date.
Reports	Summarize daily transactions, identify top customers or track inventory with a click.

Faster Transactions

Stored Tares	Complete transactions with a single weigh-in with stored truck weights.
Filter As You Type	Automatically condense lists with every letter you type.
Presets	Link vehicle, customer and other transaction info to each other for single-click selection.
Standard Tickets	Provide a summary ticket after a completed transaction.
In-Yard Tickets	Quickly identify drivers during weigh-out with in-yard tickets provided during weigh-in.

Fewer Errors

Color-coded Buttons	Complete transactions without errors or missing information.
Transaction Voids	Inaccurate information does not have to affect reporting and accounting.
Tare Updates	Automatically update vehicle weights after transactions to ensure accurate weighing.
Tare Expiration	Force tare updates by setting expiration dates.
Tare Exception %	Receive exception percentage alerts when updated tare value is outside a set range.
Transaction Summary	Quickly identify mistakes with easy-to-find transaction information in a single location.
