Your dream home awaits™

The step-by-step guide to installing your new wall panels right

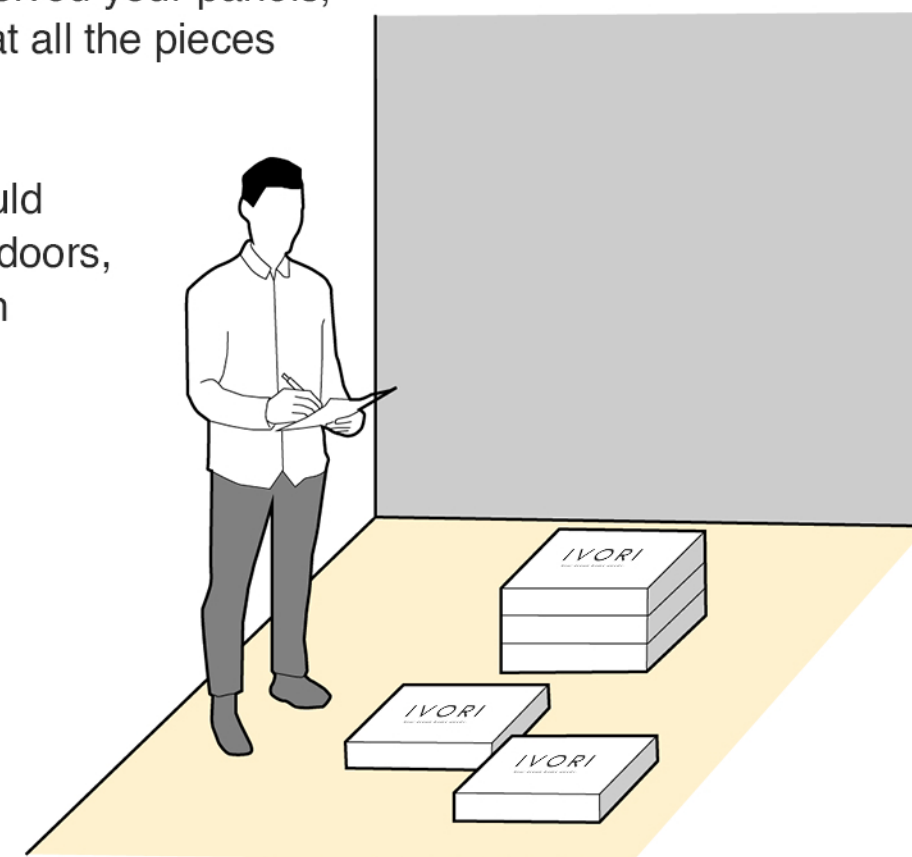

This brochure is your guide to preparing and installing your new wall panels. Inside you'll find tips and ideas, clear steps to follow, and the tools you'll need. Use this guide along with your assembly instructions to make sure your wall panels are installed correctly.

Before you begin

Take a look at this brochure to see what steps are involved in installing your new kitchen and organize what tools you'll need.

Once you've received your panels, double-check that all the pieces have arrived.

Your panels should only be stored indoors, with normal room temperature and humidity levels.

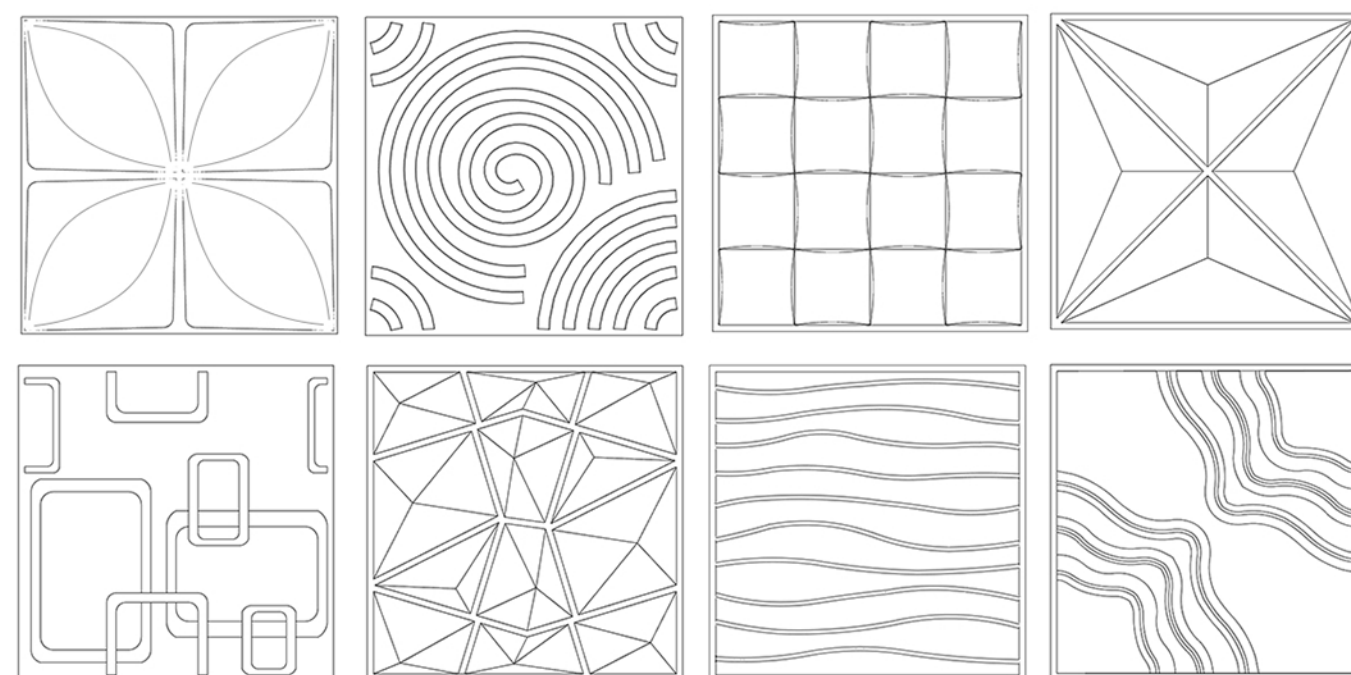

materials & tools

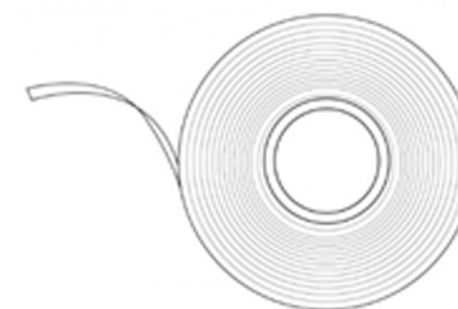

The Materials and Tools that you'll need

The tools you'll need depend on the level of finish and customizing you require for your wall. See assembly instructions for the tools you'll need to use. It's a good idea to wear safety glasses when cutting or sanding the panels.

IVORI Products Required:

Any of the IVORI Home Panels

Ivori Home Double Sided Adhesive Tape

Assistive Tools:

LEVEL

MEASURING TAPE

T-SQUARE RULER

PENCIL

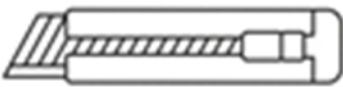

SAFETY GOGGLES

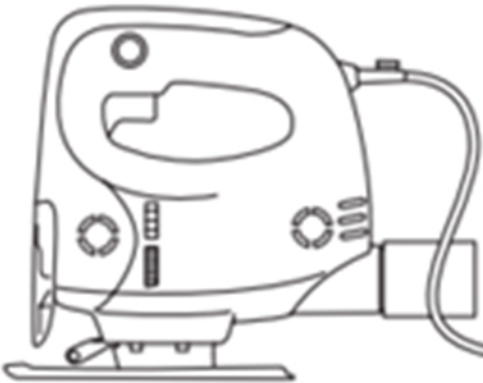

Assistive Tools – one of the following Cutting:

SCISSORS

BOX CUTTER

JIGSAW

CIRCULAR SAW

Installation Guide

Step 1 –

Prepare your room (a or b)

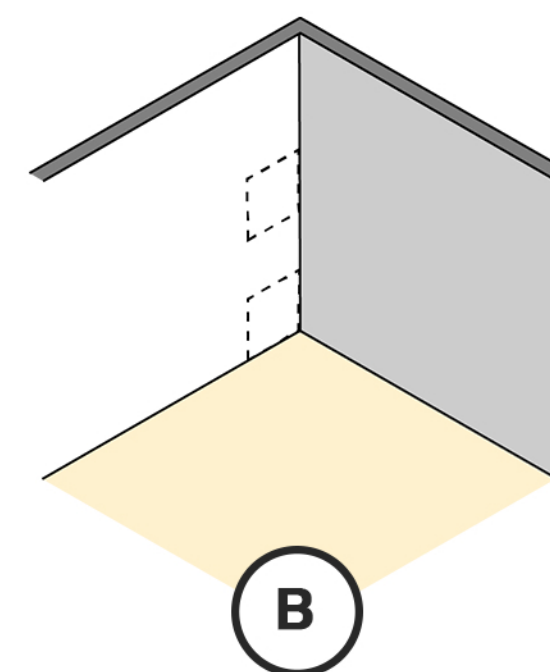

Once you're ready to install your wall panels, prepare your walls by making sure the walls are even, and that your walls are clean and that you wipe away any dust before installing your new wall panels.

Prepare your space by measuring the center of the room. Mark the center of the room with a cross and ensure that the lines are level.

Pros: Looks best

Cons: More cuts needed

No need to prepare your space, we will start installing the wall panels at the edge of the room (great for non full wall accents) or at the corner of the room.

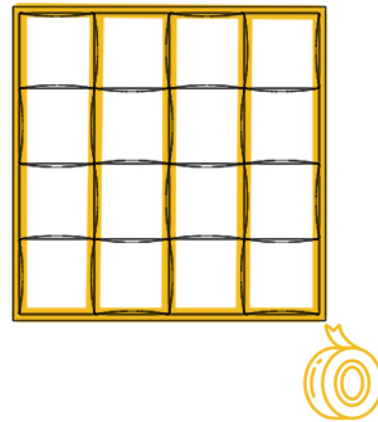

Pros: Less cuts needed

Cons: May not look as uniform depending on your space

→ Step 2 –

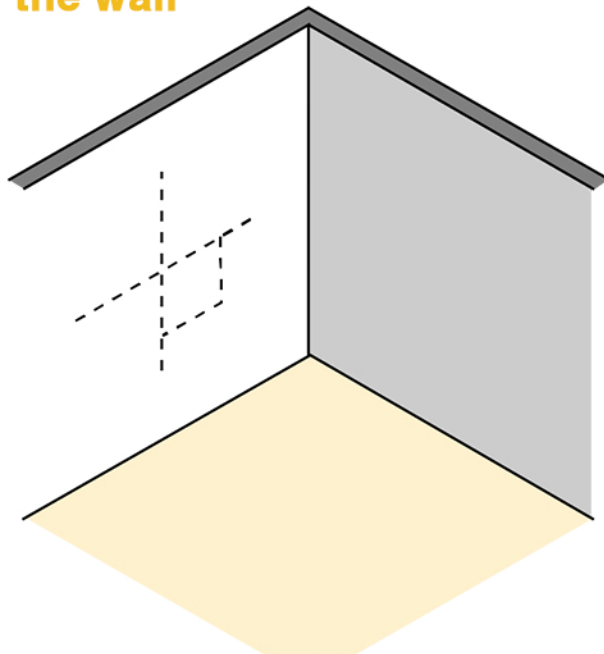

Tape your panels

Make sure the back of the panels are clean. Apply the Double Sided Adhesive Tape to the back of the panel. Make sure you apply the Tape to **all outer edges and interior edges** that contact the wall for stronger application.

← Step 3 –

Place panels on the wall

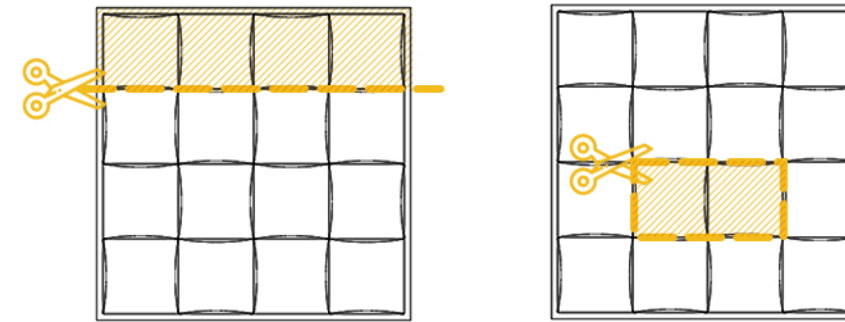

Place the IVORI Panel on the wall. Press firmly and hold. Repeat steps 2 and 3 until a majority of the wall is complete. If you are looking to do an accent wall without filling up the entire space, you are done!

→ Step 4 –

Fill in the gaps

If there are any spaces between the wall panels and the wall, measure and cut the panels so that they fit accordingly. Do the same for any electrical sockets. Repeat steps 2 and 3 and place these panels on the wall.

← Step 5 –

Sit back and enjoy

Your space is done, now enjoy your newly IVORI paneled wall!

Pro Tip

You can fill the gaps between panels using paintable caulking or acrylic latex caulking. Make sure you keep a wet rag handy to smooth the application.

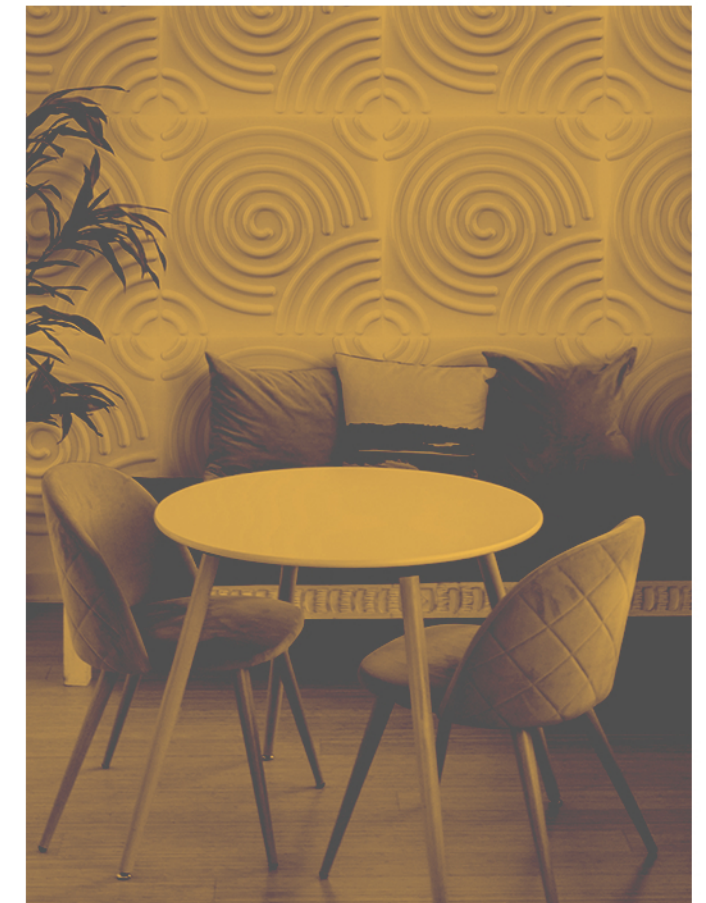

Pro Tip

After installing your panels, you can spray paint the panels to create a custom color finish. If doing so, make sure you protect your space with newspaper.

Pro Tip

You can use plastic tile spaces between each panel to create a different look.

Other Ivori Home Products:

Double Sided Adhesive Roll (50m)

The IVORI double sided adhesive roll is the perfect long holding and clean holding agent for your IVORI luxury wall panels. Our adhesive roll has the same hold as caulking and leaves zero residue or clumping!

'Touch of Gold' Trim (50m Roll)

All homes deserve luxurious touches, not just royalty. The 'Touch of Gold' Trim, an easy, self-adhesive golden trim, will surely splash some elegance in any space within your home.

Lumen Band

Turn your home into a neon, glow in the dark galactic fortress when the sun goes down! No more tripping and stumbling either with the lumen band, as it perfectly illuminates your paths, walkways, door surrounds, entrances, corridors, stairwells, walls, and more!
