

We've
developed a
way to
"soften the blow"

Blanket
Protection
for Concrete ...

Concrete columns require constant maintenance. Every time they are struck by a tow motor, paint is scraped. The concrete is cracked or chipped. Eventually, they must be replaced altogether. It involves downtime, man-hours and material costs.

Concrete Wrap, a Sentry Protection Products innovation, is the answer! Concrete Wrap is always on guard, protecting the structural integrity of your concrete column bases as well as your tow motors and operators.

Column Sentry®

Concrete Wrap

keeps your

concrete bases

virtually

maintenance free!

Column Sentry® Concrete Wrap solves all your concrete base problems, and it's:

A blanket of protection that cushions the blow

- ▶ Column Sentry Concrete Wrap, is molded from a semi-flexible, crack-resistant plastic
- ▶ Thick foam padding absorbs the force of tow motor impact, protecting your people, equipment and concrete from damage
- ▶ The vent holes force air out at a controlled rate, maintaining its shape and impact resistance
- ▶ Grips tightly around concrete, minimizing slippage when hit from any angle
- ▶ Optimal 2" thickness minimizes impact force while conserving floor space

Maintenance Free

- ▶ Eliminates the constant chipping, painting and maintenance of concrete bases
- ▶ Waterproof, easy to clean
- ▶ Chemical-resistant and non-conductive
- ▶ UV stabilized Bright Safety Yellow plastic is highly visible and permanently prevents fading
- ▶ Protects under virtually any condition and in temperatures down to 0°F
- ▶ Easily removable

Flexible with a perfect custom fit

- ▶ Available in 42" and 48" heights
- ▶ Multiple kits can be used for larger concrete applications
- ▶ Quick, easy installation:
Wrap blankets around concrete, trim off excess to create a custom fit. Tighten straps and lock in place.
- ▶ Perfect for retrofit over your existing concrete bases
- ▶ Save time, labor and the cost of other materials

And the call is FREE.
