

HEALTHY FOOD HABITS

Health Food Habits

Teenagers are interested in different foods and diets. They are conscious of body image. This new book encourages an understanding of healthy food choices for adolescents. This was specifically written for the junior students to develop health literacy skills and to evaluate the food they choose to eat.

There are many examples of foods that teenagers enjoy eating. Included are many different foods and recipe web sites. For instance, included are many coeliac, lactose intolerant, gluten free and eating less recipes to investigate. In the student book learners are encouraged to investigate and select from different web based activities and recipe types.

There are comparisons of different snack food labels and other food labels. Students have the opportunity to analyse the different snack foods and evaluate the different patterns of eating. The health information provides students with proof to make choices in developing healthy eating habits.

Food Additives ☐

Almost every item we eat, with the exception of fresh produce, will contain one or more of the 300+ food additives approved for use in Australia. This is an essential introduction to the what, why and how of an increasingly important

consumer issue. It contains chapters on why we need food additives, the difference between food components and additives, legislation, types of additives, potential harmful effects, and how to identify food additives.

ISBN: 9781920824273

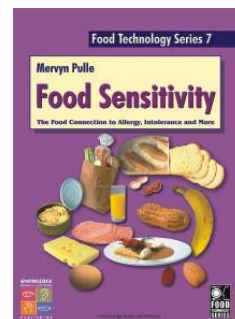

Price: \$56.95 Special Price **\$44**

Food Sensitivity ☐

The symptoms of food sensitivity can range from minor skin irritations to serious, life-threatening symptoms. Whether it is a condition from birth, or developed later in life, the signs are that food intolerance is affecting an increasing proportion of the population. With lifestyle changes leading to the increased consumption of processed foods, which invariably contain additives, this topic merits considerable attention in any study of food technologies.
