

THE ADVENTURES OF **WOMWOM!**

# DAY AND NIGHT

Simon Saffigna  
Robert T. Watts

1

**Science Series**

**Reading Recovery level:** 9

**Word count:** 130

**Text type:** Narrative

**Content:** Fiction

**Subject:** Earth and Space Sciences

**ACARA reference:** ACSSU019 Earth and Space Science - daily and seasonal changes in our environment.

**Teacher notes:** The diurnal process and the effects on animals and birds is outlined in this reader. Animals need to be studied to see varying patterns and responses. Birds generally sleep throughout the night but some are hunters when darkness falls.

**Difficult words:** morning, animals, hungry, night, birds, asleep, burrow, sunrise.

It is dawn and the sun is  
rising.  
Where is WomWom?

WomWom is sleeping. She is in her burrow.

It is morning. Some animals are hungry. Some animals sleep all night.

Many animals rest and hide.  
Birds will rest when it is  
midday.

WomWom is asleep. Some days are hot.
