

THE ADVENTURES OF WOMWOM!

# PLANTS NEED FOOD AND WATER

Simon Saffigna  
Robert T. Watts

**Reading Recovery level:** I5

**Word count:** 189

**Text type:** Narrative

**Content:** Fiction

**Subject:** Biological Sciences

**ACARA reference:** ACSSU002 Biology - Foundation level - nutrition and water.

**Teacher notes:** This book is about students identifying the needs of a range of plants. The key facts are that plants require nutrition from the recycling of nutrients and water.

**Difficult words:** explore, plants, different, vegetables, living, things, insects, butterflies, nectar, compost, dung, clouds, burrow.

WomWom is ready to explore. She is going to look at plants.

WomWom eats plants and grasses for food. She drinks water.

Plants need food and water  
to grow. Plants use light from  
the Sun to grow.

WomWom eats many  
different plants for food.  
WomWom can eat  
vegetables like carrots.

Plants are food for many living things. Insects and animals both need plants.
