Teacher notes: Animals require special places to live. All animals are different with their needs for shelter and food. This book reviews and compares animals within one specific area.

Difficult words: burrow, wombats, carer, fresh, grass, eating, danger, animals, shelter, kookaburras, dolphins, another, area, strong.

Many wild animals eat in one place and shelter in another place. WomWom wants to explore!

Some animals live in the same area as Wombats. They do not shelter in the same place as Wombats. What are the places where animals live?

WomWom eats grass in a big area. WomWom shelters in a small place called her burrow. She goes into her burrow to shelter when she is not eating.

Earthworms live in the
compost and in soil.
WomWom looks at the
earthworms in the compost.

Some animals do not live in a burrow like WomWom. Possums live in trees. A possum is safe from danger
