Designed by Keith Teboul
Shaped by Keith Teboul, Adam Lewis

The KT Surfing team led by Kai and Ridge Lenny, Ian Walsh, Annie Reickert, Nathan Berger, Kane de Wilde and Otis Buckingham are constantly expanding the design scope as new opportunities present themselves.

Their mission and demand for performance and durability are what drive our R&D and they go into every board we make.

Drifter 4 Carbon **New**

Prone, Wing, Sup

Ginxu 2 Pro Carbon **New**

Step Bottom Prone, Wing

Ginxu Super K Carbon **New**

Step Bottom Lightwind Wingfoil, Sup

Pocket Drifter Carbon **New**

Dock, Pump, Wake, Kite

Ginxu Dragonfly 2 Pro Carbon **New**

Step Bottom Downwind Sup, All-Around, Lightwind Wingfoil

Ginxu Dragonfly Crossing Pro Carbon **New**

Step Bottom Downwind Sup, Long Distance / Long Period, Lightwind Wingfoil

Ginxu Dragonfly Surf Carbon **New**

Step Bottom Downwind Sup, Surf / Short Period, Lightwind Wingfoil

Drifter 4 Carbon

Prone, Wing, Sup

Effortless and intuitive foiling, adapted for even more glide and stability.

The bottom shape flows from displacement at the front into double concave into the bevel tail. This unique bottom shape, combined with a slightly longer length and narrower outline helps the water flow effortlessly along the waterline of the board. The Drifter 4 Carbon is more stable and has more glide than ever with more maneuverability to carve and jump as hard as you dare. Now in its 4th generation, the tail has a more radical bevel for clearance and maneuverability. The Drifter 4 Carbon comes in a huge range of sizes from 14 to 170 liters. Great for electric foil assist.

Available in 14, 18, 22, 28, 34, 40, 48, 56, 64, 72, 80, 90, 100, 115, 130, 150, 170 liters.

Revolutionary Seamless Form^{KT} Technology, all new ultra faithful representation of the original shape, more precise than conventional CNC or mold process.

Carbon

Carbon Monocoque, connecting the deck carbon stance area with the bottom carbon foil track area, via vertical struts, for ultimate structural cohesion.

Full S-Glass Hull for fast response, lively flex and supreme durability.

US track boxes: 2x 13".

Soon available to pair with genuine KT foils, developed by Kane de Wilde (@kdmaui) and Jason Diffin (@jasondiffin).

All new MFC[®] footstraps, including Adjustable V-Strap on select models.

All new KT Surfing[®] Single Density Traction Pads, segmented, slotted for weight saving.

Available in Metallic Silver and Neon Yellow Tech-Reveal^{KT} finish, with inverted artwork and charcoal pads.

New

Ginxu 2 Pro Carbon

Step Bottom Prone, Wing

Radical carving and maneuvers with unmatched early take off and seamless touchdowns.

In its 2nd generation the Ginxu 2 Pro Carbon balances neutrally on or above the water. Lifting up, it paddles with ease and releases from the surface unlike anything else. Displacement front into double concave, with a reduced Ginxu Step Bottom (patented) to balance the perfect volume displacement. The ultra beveled tail creates a maximum of performance water clearance for foil carving and maneuvers. The front rails and shape are designed to land and release for the most radical foil freestyle moves and jumps, as well as seamless touch downs.

Available in 39, 46, 54, 62, 72, 82, 92 liters.

Revolutionary Seamless Form^{KT} Technology, all new ultra faithful representation of the original shape, more precise than conventional CNC or mold process.

Carbon

Carbon Monocoque, connecting the deck carbon stance area with the bottom carbon foil track area, via vertical struts, for ultimate structural cohesion.

Full S-Glass Hull for fast response, lively flex and supreme durability.

US track boxes: 2x 13".

Soon available to pair with genuine KT foils, developed by Kane de Wilde (@kdmaui) and Jason Diffin (@jasondiffin).

All new MFC[®] footstraps, including Adjustable V-Strap on select models.

All new KT Surfing[®] Single Density Traction Pads, segmented, slotted for weight saving.

Available in Metallic Silver and Neon Red Tech-Reveal^{KT} finish, with inverted artwork and charcoal pads.

New

Ginxu Super K Carbon

Step Bottom Lightwind Wingfoil, Wing Race, Sup

The next evolution in foiling performance.

The all new Ginxu Super K Carbon is the ultimate high performance freeride, surf and race wing foil board. The long and narrow outline combined with rounded hull creates the fastest glides and earliest take offs. The patented Ginxu Step Bottom gives you a more direct connection to the foil and reduces the drag during take offs. Its light wind capability is mind blowing and its narrowness keeps everything under control when it gets windy. Better suited to smaller foils rather than large span downwind foils. High speed touch downs are effortless with the extra length and rounded bottom shape providing a very forgiving ride. 3 foot straps are included.

Available in 60, 70, 80, 92, 104 liters.

Revolutionary Seamless Form^{KT} Technology, all new ultra faithful representation of the original shape, more precise than conventional CNC or mold process.

Carbon

New

All new MFC[®] footstraps, including Adjustable V-Strap on select models.

All new KT Surfing[®] Single Density Traction Pads, segmented, slotted for weight saving.

Available in Metallic Silver and Neon Orange Tech-Reveal^{KT} finish, with inverted artwork and charcoal pads.

KT

Pocket Drifter Carbon

Dock, Pump, Wake, Tow, Kite

New

A dedicated kite and wake foil board. Short length and little volume, designed for a lightning glide.

Available in Metallic Silver and Neon Yellow Tech-Reveal^{KT} finish, with inverted artwork and charcoal pads.

With its super reduced size and volume this is the maximum efficient ride. Optimized for the quickest touch-down and release. Reduced bottom surface area makes the board feel even smaller than it already is.

Available in 11 liters.

Revolutionary Seamless Form^{KT} Technology, all new ultra faithful representation of the original shape, more precise than conventional CNC or mold process.

Carbon

Carbon Monocoque, connecting the deck carbon stance area with the bottom carbon foil track area, via vertical struts, for ultimate structural cohesion.

All new KT Surfing[®] Single Density Traction Pads, segmented, slotted for weight saving.

Ginxu Dragonfly 2 Pro Carbon

Step Bottom Downwind Sup, All-Around, Lightwind Wingfoil

New

Better glide and quicker takeoff, same original Ginxu Dragonfly DNA.

The original Ginxu Dragonfly performed so well as a crossover for downwind paddling and winging in the lightest of breezes, we simply couldn't beat it. Generation 2 thus stays true to the DNA of the original, with slight tweaks in hydrodynamic flow out the tail and a repositioned Ginxu Step Bottom (patented), for better glide and quicker takeoff.

Available in 88, 95, 100, 105, 110, 121, 135 liters.

Revolutionary Seamless Form^{KT} Technology, all new ultra faithful representation of the original shape, more precise than conventional CNC or mold process.

Carbon

Full Carbon Hull, connecting deck, bottom and rails, for all encompassing lightning fast response and supreme stiffness.

US track boxes: 2x 13".

Soon available to pair with genuine KT foils, developed by Kane de Wilde (@kdmaui) and Jason Diffin (@jasondiffin).

All new KT Surfing © Single Density Traction Pads, segmented, slotted for weight saving.

Available in Metallic Silver and Neon Orange Tech-Reveal^{KT} finish, with inverted artwork and charcoal pads.

Ginxu Dragonfly Crossing Pro Carbon

New

Step Bottom Downwind Sup, Long Distance / Long Period, Lightwind Wingfoil

The ultimate channel crossing downwind race board, design for maximum paddle speed, so you can use the fastest, smallest foil you dare.

The newly launched Ginxu Dragonfly Crossing Pro Carbon has been designed for open ocean crossings and softer, rounder rolling swell conditions. It's longer and narrower, with a repositioned Step Bottom (patented) and a full displacement front. The Crossing delivers the fastest gliding outline on any KT board. With a reimagined, revolutionary volume flow, the fuller nose keeps the nose from diving in tight swells, whilst keeping a neutral well balanced volume distribution throughout the length of the board. Featuring the trademark Dragonfly kick tail for clearance and carving, with a more inset deck for balance and more controlled, direct deck feel. All of this combines to create the best top paddle speed, meaning ocean crossings and flatter water paddle ups are, in one word, effortless.

Available in 88, 94, 100, 105, 112, 120 liters.

Revolutionary Seamless Form^{KT} Technology, all new ultra faithful representation of the original shape, more precise than conventional CNC or mold process.

Carbon

Full Carbon Hull, connecting deck, bottom and rails, for all encompassing lightning fast response and supreme stiffness.

Available in Metallic Silver and Neon Red Tech-Reveal^{KT} finish, with inverted artwork and charcoal pads.

Ginxu Dragonfly Surf Carbon

New

Step Bottom Downwind Sup, Surf / Short Period, Lightwind Wingfoil

Make the entire ocean your playground.

Featuring a flatter displacement bottom, feeding into a double concave and a more forward positioned Ginxu Step Bottom (patented) with a wider outline make the Ginxu Dragonfly Surf Carbon the most stable of all the Dragonfly range. Whilst still maintaining the glide and low end speed we've come to love. The slightly more compact, wider outline with the reimagined volume flow make taking off in steeper, tighter swells what this board is all about. The same goes for Sup surf foiling. The more defined deck concave gives you a more stable and connected feel to the board. Turning downwind paddle runs into an endless wave.

Available in 95, 100, 105, 110, 120, 130, 145 liters.

Revolutionary Seamless Form^{KT} Technology, all new ultra faithful representation of the original shape, more precise than conventional CNC or mold process.
