

For all passenger cars
up to a total weight of 3.5 tonnes

For all passenger cars and commercial
vehicles up to a total weight of 5 tonnes

SPIKES-SPIDER **EASY** **SPORT**

- Swiss Quality Product made from high quality Nirosa steel (stainless) with tungsten carbide studs.
- Simple and quick mounting, even with narrow wheel arches.
- Convenient mounting on the front of the tyre.
- Even simpler and quicker pre-mounting of the fastening system to the wheel nuts / bolts with a centered dual fastening system.
- 4 sizes cover all tyre sizes.
- Simple size adjustability of each chain by at least 220 mm.
- The fastening parts are included in the set for all common opening widths (17, 19, 21 mm). Special sizes (for opening widths 22 + 24 mm) can be ordered separately.
- The practical belt tensioner enables the quick and easy tightening of the chain.
- No retightening of the chain after start-up.
- Simple mounting of the chain, even in extreme situations.
- Powerful traction on ice and snow through the combination of the Nirosa chain and high quality tungsten carbide studs.
- For all vehicles up to a total weight of 3.5 tonnes.
- Suitable for all steel/aluminium wheel rims.
- Utilisability: -35 °C to + 10 °C
- Manageable packaging size.
- All parts are available as spare parts.
- Used by emergency services, such as the "German Red Cross".
- Practical carrying bag, mounting tools and accessories in the scope of delivery.
- Approved worldwide as a snow chain.

**Practical and powerful
on ice and snow!**

SPIKES-SPIDER **EASY** **ALPINE PRO**

**The ideal solution for professionals
- when speed is of the essence!**

QUICK & EASY

SPIKES SPIDER

SWISS MADE

Safety on ice and snow!

1. Bolt the fastening elements to 2 wheel nuts on each wheel rim.

2. Mount the chain on the tyre and secure with the rail on the dual fastening system.

3. Tighten the snow chain with the belt tensioner.

4. Attach cover and set off.

The chain automatically tightens on the tyres during start-up and is optimally aligned.
