

AGELESS IRON

AN EXPANDED WORLD OF DESIGN POSSIBILITIES...

Ageless Iron launches new cabinet hardware with six stylish collections.

(Denver, CO – April 27, 2022) Ageless Iron is pleased to announce their expansion into cabinet hardware with the unveiling of six new designs. As a global brand known for creating premium iron door hardware, their move into cabinet hardware is a natural progression. Featuring knobs and pulls in a variety of styles and sizes, this new hardware is certain to be a welcome addition to stylish kitchens and bathrooms everywhere.

In keeping with their existing hardware lines, the new designs are offered in a beautiful black finish that compliments both rustic and contemporary motifs. The rich black hue provides a welcome contrast against white or light-colored cabinets and drawers and is very on-trend amongst the most popular styles. With their clean lines and simple silhouettes, the new cabinet hardware is particularly well suited for both modern farmhouse and industrial chic decors, two distinctive styles that continue to dominate as today's most sought-after design aesthetics.

Ageless Iron offers an array of distinctive designs that are well suited for fashion-forward living spaces. Here is a closer look at their newest offerings:

- **Aeg Cabinet Knobs** – This graceful oval shape is classic and timeless, an elegant choice for any setting.

- **Keep Cabinet Knob** – A simple and clean round knob that is visually appealing and feels substantial to the touch.
- **Turret Cabinet Knob** – Subtle circular detailing adds interest and is perfect for rustic yet modern decors.
- **Castle Cabinet Pull** – Instantly recognizable as a classic favorite, this enduring style comes in 3" and 4" lengths.
- **Barn Pull** – Available with angled or rounded corners, this versatile pull allows room for design flexibility.
- **Machine Pull** – The square footing and refined silhouette dress up this pull with a more formal appearance.

All Ageless Iron hardware is zinc-plated and powder coated for long-lasting beauty and impressive resistance to scratches, corrosion and UV weathering. Choose from a variety of sizes to fit everything from petite drawers in small powder rooms to the largest appliance cabinets in busy kitchens, with pulls offered in 3", 6" and 8" lengths. Ageless Iron provides screws in two sizes for easy installation and backs all hardware with an impressive five-year warranty.
