

BONDI AWNING REPLACEMENT

GLAZING DIVISION

MAGICGLASS

LOCATION: HALL ST, BONDI NSW
DURATION: 4 HOURS
PROJECT SCOPE: REPLACE DAMAGED AWNING
PANEL TO CLIENT SPECIFICATIONS

Fabrication and installation of custom
clear heat strengthened toughened
laminated safety glass awning panel

The Challenge

This project required the removal and replacement of a damaged glass awning panel in Bondi. Magic Glass was tasked with removing the glass panel, fabricating a new panel that met all client specifications and installing the new panel using a crane.

The Solution

Magic Glass met this challenge head-on. We obtained the required permits to complete the job safely and operate cranes in the area. Our fabrication team manufactured a 17.52 mm clear heat strengthened toughened laminated safety glass that matched the required frit pattern perfectly. Our Glazing team then successfully installed the glass awning panel into its frame.

The Feedback

The job was well-executed in a safe and efficient manner. The feedback we received from the client was very positive.

Project Points

✓ Delivery Model

Fabrication and installation of custom 17.52 mm clear heat strengthened toughened laminated safety glass awning panel with frit pattern.
