

LOCATION: 57 ASHMORE STREET, ERSKINEVILLE
DURATION: 6 WEEKS
CLIENT: ZEDKON

Fabrication and installation of all frames, doors, glass panels, and windows.

The Challenge

This project required the refurbishment of a childcare centre situated in Erskineville. Our client oversaw the development and contracted Magic Glass to complete all required glazing work. This included the manufacturing and installation of all commercial grade doors throughout the facility.

The Solution

Magic Glass successfully completed the required installation of all commercial grade doors on schedule. Our team fabricated and installed 25 doors with 12.38mm clear laminated glass, as well as all fixed glazing panels which looked out into the outdoor play area.

The Feedback

The feedback we have received from our client has been positive due to delivering the project on time before opening day. We are proud to have worked alongside them to complete this project.

Project Points

✓ Delivery Model

All glazing requirements. This included the fabrication and installation of all frames, doors, glass panels, and windows.
