

LOCATION: NORTH SYDNEY, NSW 2060  
DURATION: 7 DAYS  
CLIENT: NORTH SYDNEY COUNCIL

Installation of ladder brackets and anchor points on heritage buildings

## The Challenge

Magic Glass was appointed by the North Sydney Council to install height-safety systems across 8 heritage-listed buildings in the area.

## The Solution

Our Rope Access team successfully completed all height-safety works required, ensuring all buildings are in compliance with current Australian Safety Standards.

Being heritage buildings, the properties required additional care when installing height-safety systems. Magic Glass approached this issue by installing ladder brackets and anchor points that are suited to the buildings' antique characteristics, and allow for safe roof access without jeopardising the appearance of the buildings.

## The Feedback

The feedback we got from our client was very positive. They were happy with the quality and outcomes of our work.
