deep color complex

additive for hair color services

ADDITIVE FOR TECHNICAL HAIR COLOR SERVICES,
SPECIFICALLY FORMULATED TO IMPROVE INTENSITY,
COVERAGE AND DURATION OF COLOR, WHILE FAVORING THE PROTECTION
AND CONDITIONING OF THE HAIR DURING THE TECHNICAL SERVICE.

HOW TO WITHDRAW **DEEP COLOR COMPLEX**

Insert the spout of the syringe into the opening of the bottle.

Rotate the bottle and the syringe by 180° and withdraw the desired quantity of product by pulling the piston and taking note of the measuring lines on the body of the syringe.

Rotate the bottle and syringe again to bring them back to the initial position, then extract the syringe and add the product to the prepared technical color formula.

instructions for use:

prepare the color following the instructions on the packaging; add 3 ml of additive for every 50 g of color. Proceed with the color service as usual.

Warning: before applying any hair color, take a preliminary sensitivity test as instructed on the packaging/instructions sheet of the color product.

For example: prepare the color formula and add 50 g of **creative permanent colour**, 75 g of **oxidizing emulsion** of the adequate volume (100 g of oxidant to 40 vol for ultra blondes). Add 3 ml of **deep color complex**, mix and proceed with the application of the mix as indicated on the color instructions sheet.

suggestions for perfect results:

/ **the consistency of the color mix may vary according to the color formula, oxidizing emulsion and proportions used.** When adding **deep color complex** there may be a slight loss of consistency/increase in fluidity. In such case, it is important to pay careful attention during the application phase: using the color brush, apply an adequate quantity of color mix to the hair, distributing it evenly and making sure not to transfer it excessively to the ends of the hair.

/ **the addition of additives does not alter the volume criteria of the oxidizer**, the application method, the mix or processing time.

/ **all warnings and indications** that accompany the individual products remain valid.

safe lightener complex

additive for hair lightening services

ADDITIVE FOR TECHNICAL HAIR LIGHTENING SERVICES,
SPECIFICALLY FORMULATED TO RESTRUCTURE AND CONDITION THE HAIR
DURING THE TECHNICAL SERVICE, FAVORING AND AT THE SAME TIME
IMPROVING THE LIGHTENING PROCESS.

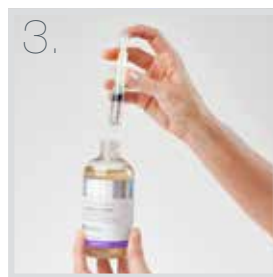

HOW TO WITHDRAW **SAFE LIGHTENER COMPLEX**

Insert the spout of the syringe into the opening of the bottle.

Rotate the bottle and the syringe by 180 degrees and withdraw the desired quantity of product by pulling the piston and taking note of the measuring lines on the body of the syringe.

Rotate the bottle and syringe again to bring them back to the initial position, then extract the syringe and add the product to the prepared lightening mix.

instructions for use:

prepare the lightening mix by following the instructions on the packaging; add 5 ml of additive for every 30 g of lightening powder. Proceed with the technical service as usual.

Warning: before applying any lightener, take a preliminary sensitivity test as instructed on the packaging/ instructions sheet of the lightening product.

For example: prepare the lightening mix adding the equivalent of 30 g of powder, 35 ml of cream oxidant of the most suitable volume to a measuring bowl of **light [10] white**. Add 5 ml of **safe lightener complex**, mix and proceed with application as indicated on the lightener instructions sheet.

suggestions for perfect results:

/ **the consistency of the lightener mix may vary according to the lightener and the oxidizing emulsion and proportions used.** When adding **safe lightener complex** there may be a slight loss of consistency/ increase in fluidity. It is possible to adjust the consistency by adding a small amount of powder (max. 5 g).

/ **the addition of additives does not alter the volume criteria of the oxidizer,** the application method, the mix or processing time.

/ **all warnings and indications** that accompany the individual products remain valid.

deep color maintainer balm

intensive maintenance conditioner for color treated hair
