

# ADVANCED LED TECHNOLOGY

atom

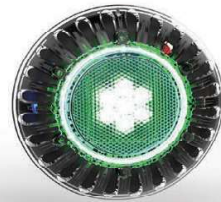

VINYL

The ATOM series for Vinyl pools introduces a host of innovative solutions and impressive performance characteristics for vinyl pools.

With up to 900lm output from its MULTI PLUS LED, the ATOM series is one of the brightest mini niche lights available on the market today.

Its patented detachable cable system allows for simple installation and winterization. While its robust niche design and vinyl sealing system, ensures a trouble free installation.

With so many features in one product, its easy to see why the ATOM EMV is the only choice in LED pool lighting.

FIBREGLASS

The ATOM series for fibreglass pools are fast to install, easy to operate and the performance will make the neighbours green with envy.

The ATOM Fibreglass' innovative niche design takes all the hard work out of installation. With its self alignment feature, the ATOM's niche assembly will adjust to variations in the fibreglass shell ensuring a robust seal every time.

Available in the all new MULTI PLUS and featuring the ATOM series patented detachable cable system as standard. The ATOM Fibreglass is set to revolutionize fibreglass pool lighting.

CONCRETE

The ATOM for Concrete pools has been specifically designed with the builder in mind. Its innovative design and mounting system ensures a perfect installation every time.

An industry first for the ATOM Concrete is its auto- alignment ring, ensuring the ATOM aligns perfectly to the pool wall even if the niche shifts during construction.

Don't let its small size fool you though, with up to 900lm output, MULTI PLUS LED and a size small enough to fit anywhere, the ATOM Concrete will transform any concrete pool into a night-time masterpiece.

POWER

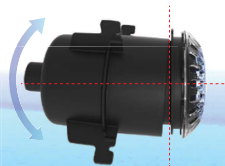

The LVX Series safety isolating transformer has been purpose built for the swimming pool industry. Featuring a host of innovative features, the LVX Series will simplify your installation while providing your clients with quality, long lasting power supply for their underwater lighting systems.

The LVX Series innovative case design allows the unit to be installed in multiple orientations, allowing you to position the transformer to best suit the installation; minimising the use of unsightly conduit and ensuring a clean and professional installation every time.

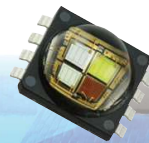

Combine this with large termination compartments, 4 x DUAL 1/2" / 3/4" and 4 x 3/4" conduit knock-out positions with a robust and stylish case design that completes any pool installation.
