CROSSWIND V

HPPH-90700
Ready To Config

UP · CONNECT · SERVICE · MODE · DOWN
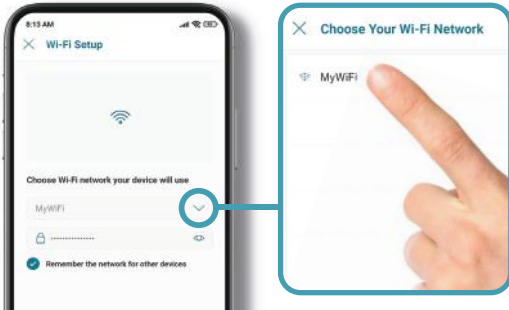

The CONNECT key displays the ID and connectivity status.
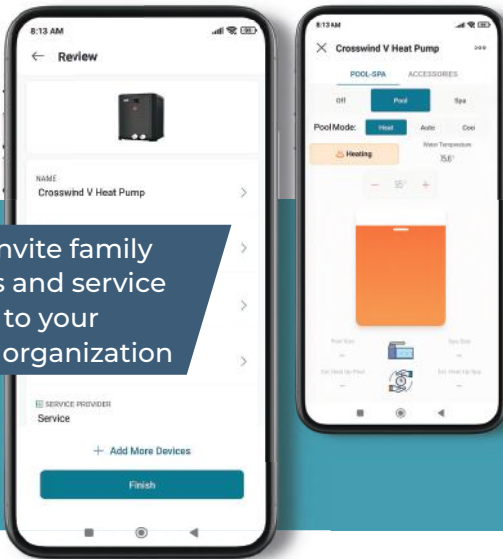

5 Select your Wi-Fi network and enter your password

Make sure to have a strong Wi-Fi signal near the heater.

6 The heater is connecting to your Wi-Fi

7 Name your heater to complete the setup and enjoy Raymote control

You can invite family members and service suppliers to your Raymote organization

📺 Control and schedule your pool heater

⚙️ Automates heat up time by learning pool size

📡 Raymote mobile app – allows on-the-go control of your pool temperature and so much more

Having trouble connecting your heater?

Try these suggestions to improve your Wi-Fi signal:
- Confirm that your Wi-Fi signal strength is strong enough to reach the heater (walls and fences may affect Wi-Fi signal)
- Reduce distance between Wi-Fi router and the heater
- Add a Wi-Fi range extender
- Enable a new Wi-Fi access point
