

TRUFIT™ BUBBLER
WITH PRESSURE CHECK TECHNOLOGY

Jandy®

**DRAMATIC RESULTS.
EASY INSTALLATION.
MAXIMUM FLEXIBILITY.**

TRUFIT™
BUBBLER

The easy-to-install Jandy® TruFit™ Bubbler provides maximum flexibility for a dramatic effect

Add a tranquil and luminous ambiance to your outdoor living spaces with the Jandy TruFit Bubbler — designed for easy installation and servicing and engineered for reliable operation using NEW Pressure Check technology.

A Better Bubbler

- Maximum Flexibility**
 TruFit comes with two lens options that allow you to choose between a taller, narrower fountain or a lower, fuller plume.
- Powerful Plume**
 Designed for improved hydraulic flow, the TruFit bubbler provides more powerful propulsion using less energy.
- Straight Shooter**
 Maximize height and effect with water that shoots straight. TruFit features a strategically engineered diffuser to help reduce a swirling effect or lost plume height due to water spiraling out of traditional bubblers.
- A Perfect Match**
 For the ultimate effect, the TruFit Bubbler is designed to work with Jandy HydroCool® nicheless LED lights (sold separately).

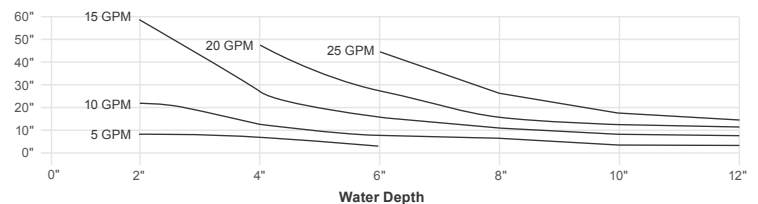

Most installation-friendly bubbler on the market

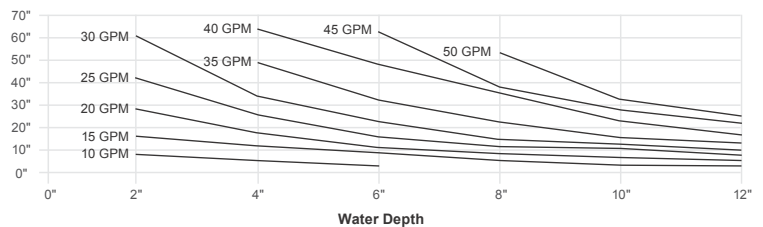

- Height Adjustable**
 To get a flush finish in gunite pools every time, TruFit features an adjustable sleeve that can be incrementally raised by 0.25" up to 1-inch or custom cut using indicated measurements prior to the plastering process.
- Leak-Free Assurance**
 The only bubbler on the market with NEW Pressure Check technology that provides the ability to pressure test the water line before and after lights are installed — so it can be pressure checked throughout the construction process to ensure reliable operation for the long run.
- Easy to Install & Service**
 At less than 8 inches in height, TruFit sits just below the surface so there's no need to dig deep during installation. Likewise, the light sits close to the top of the lens, allowing you to simply and quickly swap it out as needed.
- Precision Placement**
 A convenient cover handle marks the highest height of the bubbler so that you can appropriately provide for expected level of plaster ensuring precise placement for a flush finish.
- Ideal for Any Pool**
 The TruFit Bubbler is designed for gunite pools and can be installed in fiberglass and vinyl pools with an accessory kit.

PERFORMANCE

1/2" NOZZLE PLUME HEIGHT

3/4" NOZZLE PLUME HEIGHT
