better world

Date: October 2022

Year of bunkering: 2021

## CLIENT CERTIFICATION

On behalf of GoodShipping,  
I can confirm that together we reduced  
**37,59 tonnes CO<sub>2</sub>e (WtE).**

Dirk Kronemeijer  
CEO GoodShipping

**Awarded to**

FLSK Products GmbH

CO<sub>2</sub>e EMISSIONS AVOIDED

**37,59 t CO<sub>2</sub>e (WtE)**

TRANSPORT SEGMENT

**Ocean Freight Transport**

PRODUCT USED

**GoodFuels BioFuel**

- This volume of CO<sub>2</sub>e has been reduced via a fuel switch, supplying the corresponding amount of advanced maritime biofuel to a vessel that would have otherwise burned fossil fuel.
- All biofuels used are made from materials that are labelled waste and residues, are approved by the GoodNRG sustainability board, and certified by the International Sustainability & Carbon Certification (ISCC) or ISCC accepted certification schemes.
- The CO<sub>2</sub>e emission reduction mentioned in this statement is part of GoodShipping's total CO<sub>2</sub>e emission reduction as included in the Emission Savings report January – November 2021. EY has performed a limited assurance engagement on this Emission Savings report.
