

# Sii Capo

## JACKET

### CHEST

#### Chest:

STEP 1: Unfold the jacket and lay flat side ways

STEP 2: Flip the sleeve and place tape measure horizontally underneath the armhole. STEP 3: Extend the tape horizontally till the edge of the jacket

STEP 4: Extend the other half of the tape horizontally till the back center seam.

STEP 5: Double the measurement, and minus one and you will have the chest measurements

For example:  $21 \times 2 = 42$ ,  $42 - 1 = 41$ , hence 41 inches will be the finished measurement for the chest.

### WAIST

#### Waist:

STEP 1: Lay flat the jacket with all buttons fasten

STEP 2: Find the slimmest part of the jacket (around the first button area) STEP 3: Pull tape measure horizontally across the jacket

STEP 4: Take the measurement and double it and you will have the finish waist measurement

For example:  $17.5 \times 2 = 35$ . hence **35 inches** will be the finished measurement for the waist.

## HIPS

### Hip:

STEP 1: Lay flat the jacket with all button fasten

STEP 2: Measure up 3-4 inches (depending on jacket style) from the bottom corner of the jacket STEP

3: Place tape measure horizontally 3-4 inches from the bottom

STEP 4: Pull tape measure horizontally to both edge

STEP 5: Double the number indicate on the tape and you will have the finished measurement for hip

For example: **40 inches** will be the finished measurement for the hip.

## BACK LENGTH

### Back Length:

STEP 1: Lay flat the jacket, back facing upwards

STEP 2: Find the attaching point of center seam and under collar felt

STEP 3: Start measuring from the attaching point of the under collar felt and back center seam

STEP 4: Pull tape measure straight down parallel with back center seam until the bottom of the jacket

For example: **26 inches** will be the finished measurement for the back length.

# PANTS

## WAIST

### Waist:

STEP 1: Lay pants flat, zipper side facing upward. STEP 2: Gently stretch both edge of the waistband. STEP 3: Place tape measure parallel to waistband. STEP 4: Extend tape measurement horizontally until reaches both edge. STEP 5: Double the number indicates on the tape and you will have the cuff measurement. For example:  $16.5 \times 2 = 33$ , hence **33 inches** will be the finished measurement for the waist.

## HIPS

### Hip:

STEP 1: Lay pants flat, zipper side facing upward. STEP 2: Find the lowest point of the pockets or widest point. STEP 3: Place measure tape horizontally from point to point. STEP 4: Double the number indicates on the tape and you will have the finished hip measurement. For example:  $20 \times 2 = 40$ , hence **40 inches** will be the finished measurement for the hip.

## LENGTH

### Out seam:

STEP 1: Lay pants flat sideways

STEP 2: Find the outside seam of pants.

STEP 3: Place tape measure on top of the out seam.

STEP 4: Extend tape measurement parallel to the outside seam until reaches both end of the pants

For example: **35.75 inches** will be the finished measurement for the outs seam.
