

design TOSCANO®

INSTRUCTIONS FOR YOUR PRODUCT

Thank you for your recent purchase of this Design Toscano hand-crafted garden fountain. We have taken great care to create this piece especially for you. Please review these instructions and assemble this piece with care. Do not over tighten any connection.

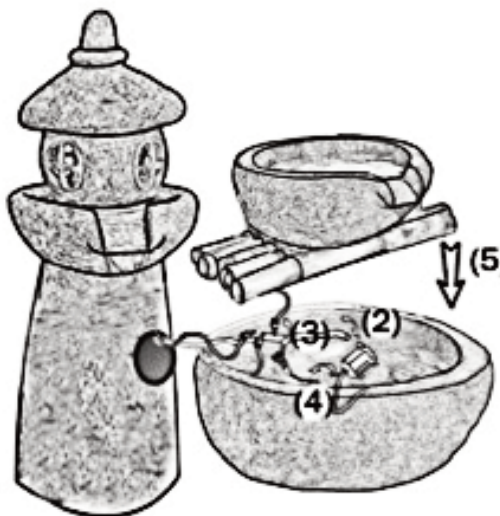

Step 1

- (1) Attach LED light from pagoda to the 3-way splitter located in bottom basin.

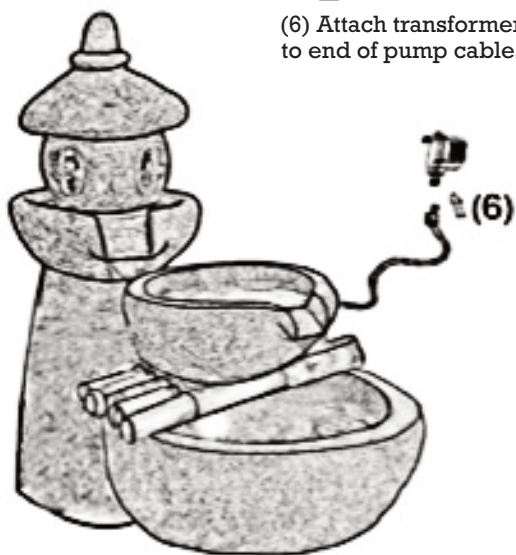

Step 2-5

- (2) Connect the flexible hose from pagoda to the pump outlet.
 (3) Connect the LED light cord from top basin to the 3-way splitter located in bottom basin.
 (4) Connect the 3-way splitter to pump.
 (5) Place top basin on bottom basin using notches on basin rim to align.

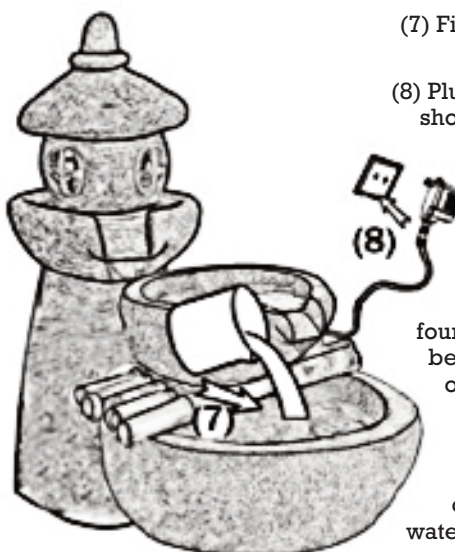

Step 6

- (6) Attach transformer to end of pump cable.

Step 7-8

- (7) Fill basin with water, making sure pump is fully submerged.
 (8) Plug in pump and switch on, after a short time water will start to flow. Add water as needed.

Adjust flow rate to achieve desired effect and to minimize splashing. Splashing can occur if the flow rate is too high or the fountain is too full. The flow rate can be increased (move switch to '+') or decreased (move switch to '-') by moving the flow rate control slider on the pump body.

Water will naturally evaporate depending on conditions. Add water as needed. Never let the pump run dry as it will damage the motor.
