

#### Installation Instructions:

1. Read the "How to Maintain Fountains" instruction sheet included with your shipment. (On reverse side)
2. Place base of fountain on a hard or solid surface, such as a concrete pad, pavers stones, bricks, or compacted pea gravel. Make sure base is level with the ground. If not level, place a shim under to level
3. Place basin on top of base and center.
4. Place pump in left compartment towards rear of basin. Drape pump cord over basin and run along back of base so it is not visible.
5. Connected clear vinyl tubing to nozzle on pump and secure. Temporarily drape tubing over back of bowl.
6. With two or more people, lift top component of fountain and place on top of basin as shown. To ensure that there is no damage, place burlap (used for packaging) around edges of basin.
7. Cut tubing to length and attach to PVC elbow on back of ftn.
8. Secure top of fountain to a wall, post, or fence using supplied turn-buckle and eyebolt. Turn buckle should attach to the steel bar towards the top and back of fountain.
9. Fill basin full of water and plug in pump. Adjust water flow using blue dial on front of the pump.
10. Enjoy your new Giannini fountain!
11. E-mail a picture of your installed fountain to [info@gianninigarden.com](mailto:info@gianninigarden.com) for a 10% off coupon on a future purchase.
