

Digital Caliper IP54 Water Resistant

User Manual

Features

- Premium high-quality digital caliper
- Extra-large LCD display for easy reading
- Metal cover for protection and durability
- Constructed with HRC 52.5 hardened stainless steel shafts
- IP54 water resistant for use in wet environments
- Inch/metric conversion and zero setting at any position
- Four-way measurement: outside, inside, depth, and step
- Accuracy: $\pm 0.001''/0.03\text{mm}$
- Resolution: $0.0005''/0.01\text{mm}$
- Battery: 3V CR2032 (included)

Specifications

| Item | Range | Resolution | Accuracy |
|-----------|-------------|----------------|---------------------|
| 2015-0150 | 0-6"/150mm | 0.0005"/0.01mm | $\pm 0.03\text{mm}$ |
| 2015-0200 | 0-8"/200mm | 0.0005"/0.01mm | $\pm 0.03\text{mm}$ |
| 2015-0300 | 0-12"/300mm | 0.0005"/0.01mm | $\pm 0.04\text{mm}$ |

Instructions

1. Turn on the caliper by pressing the ON/OFF button.
2. Select the desired unit of measurement by pressing the INCH/MM button.
3. Zero the caliper by closing the jaws and pressing the ZERO button.
4. Start measuring: view APPLICATIONS for more information.
5. Turn off the caliper by pressing the ON/OFF button or leave it idle for 5 minutes to save battery power.

Step Measuring

Caution

- Do not expose the caliper to extreme temperatures, humidity, dust, or direct sunlight.
- Do not apply excessive force or shock to the caliper.
- Do not disassemble or modify the caliper.
- Do not use the caliper for any purpose other than measurement.
- Do not use the caliper near magnetic fields or electrical equipment.
- Do not clean the caliper with organic solvents or abrasive materials.
- Replace the battery when the display becomes dim or blank.

Care and Maintenance

1. Clean caliper regularly with a dry cloth to remove any dirt or oil that may have accumulated during usage.
2. Get vernier calibrated after every fixed duration to keep its accuracy and precision at topmost level.
3. Store caliper in a cool and dry place away from moisture. Use storage box if available.
