Good ventilation, along with other preventative actions, can help prevent you from getting and spreading COVID-19
Even without an open window, fans can improve it!
1

PLACE A FAN AS CLOSE AS POSSIBLE TO AN OPEN WINDOW BLOWING OUTSIDE. POINT FANS AWAY FROM PEOPLE
2

USE A PORTABLE HIGH-EFFICIENCY PARTICULATE AIR (HEPA) CLEANER TO FILTER AIR

3

USE AN EXHAUST FAN TO MOVE VIRUS PARTICLES IN THE AIR FROM INSIDE YOUR HOME TO OUTSIDE

4

USE CEILING FANS TO HELP IMPROVE AIR FLOW

5

AT HOME, TURN ON THE EXHAUST FAN IN YOUR BATHROOM TO HELP MOVE AIR OUTSIDE
