☆ Includes 2 styles of letters (black & white)
(and tips for printing other sizes)

☆ Also includes png files to use with a Cricut or
Silhouette machine

☆ Includes directions for use, fonts used, tips for printing & adjusting the sizes

Thank You!

Thank you so much for your purchase I'm so excited for this line of bulletin boards to save you time. Bulletin boards can be time consuming so I'm hoping to make it easier and faster for you. Read on for directions on how to use this file.

Fonts Used

There are several different options for printing. You could print the outline letters out on white paper and cut them out (1), print the print and cut in rectangles instead of around each letter (2), or you could make that easier, when you print in the "Multiple" section, determine how many you want to print to a page and then click "Print Page Border." This will give you lines to cut on to make it easier.

Options for Printing

For more help with different ways to print and adjust the sizes included sizes do not work for you, check out this SECTION from Adobe.

Assembling Your Bulletin Board

1. Decide on what size letters you want to use for your board.
2. Print out what you need on colored paper or white paper.
3. Cut out the letters by hand or using a digital machine (Silhouette, Cricut, etc.)
4. Use the printable honeycomb border around the edges of the bulletin board.
5. Staple the pieces to your bulletin board using the sample board below as a guide.
6. Surround the quote with the bees the students make.

Note: A few optional things that I added just to help things pop a bit more on the board.

- I traced the wings with black marker once they were on the board so you could see them better, you could also just cut the wings and leave the black line on it.
- I used a black marker to draw little lines behind each bee so they look like they are moving behind it. No need to measure or have it exact, I just wanted another color to off set the yellow.

1 + 2

This bulletin board is designed to be cut by hand, but I've included PNG files if you want to use those on a cutting machine like a Silhouette or Cricut. Directions are NOT included for cutting machines as they all vary.

THE BEE IS MORE HONORED THAN OTHER ANIMALS,

NOT BECAUSE IT LABORS,

BUT BECAUSE IT LABORS FOR OTHERS

-Saint John Chrysostom

Decorate the board with student created bees

*Directions & templates included

THE BEE IS MORE HONORED

NOT BECAUSE IT

Perfect to display all year long or when teaching about ways to serve (and labor) for others
