Valido per ogni modello - Valid for any model

ITA: Quando hai finito di montare la pista, regola accuratamente la lunghezza dei cavi (facendo scorrere su e giù il cursore nero). Per verificare se i vari tratti della pista hanno la corretta pendenza, fai correre qualche biglia a mano.

ENG: Once you have finished building the track, adjust carefully the length of the suspension cables (by sliding up and down the black cursor). To check that all the stretches of track have the correct inclination, drop a few marbles by hand.

FRA: Lorsque tu as fini de monter la piste, règle avec attention la longueur des câbles en faisant glisser le curseur noir. Pour vérifier si les divers segments de la piste ont une inclinaison correcte, fais rouler quelques billes manuellement.

ESP: Una vez acabado el montaje de las pistas, regula con cuidado la longitud de los cables de suspensión, deslizando el tensor negro. Para comprobar que todos los tramos de la pista tienen la

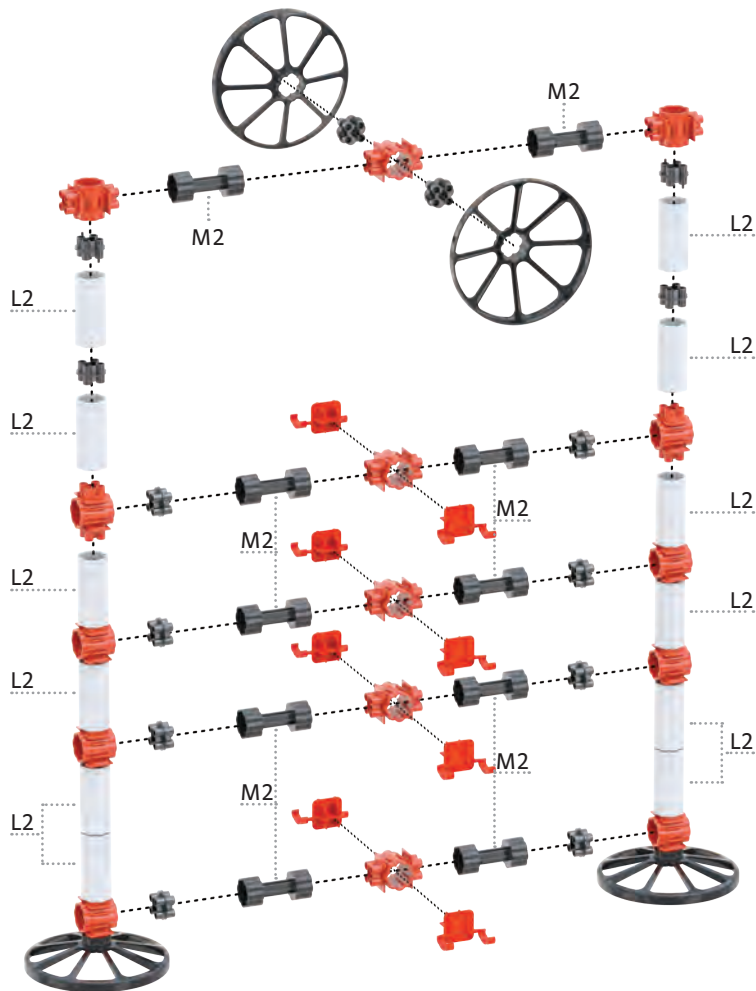

inclinación correcta, haz rodar algunas canicas manualmente.

DEU: Wenn Sie die Kugelbahn fertig gestellt haben, passen Sie behutsam die Länge der Kabelaufhängung an. Um zu Prüfen, dass alle Streckenteile korrekt zusammengesetzt wurden, lassen Sie einige Murmeln per Hand die Bahn hinunterlaufen.

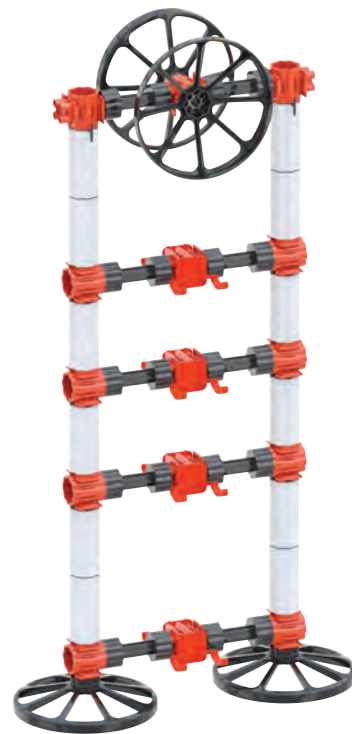

NED: Zodra je klaar bent met het bouwen van het spoor, pas je de lengte van de hangkabels aan (door de zwarte cursor op en neer te schuiven). Controleer of alle stukken van het spoor de juiste helling hebben door wat knikkers met de hand op het spoor te laten vallen.
