In-Stock

CATALOG

2023

TABLE OF CONTENTS

Welcome to our latest and greatest In-Stock Product Catalog! The buttons in blue are short cuts to help you jump around this document to the sections you want to access (click on them and see what happens!). You will also note these are on on the blue pages for each segment of our In-Stock offerings. Those ones link to our website.

Our catalog is broken into segments. You will notice that we no longer categorize our products by collection. For ease of use and clarity we have put our products into 3 groups: Cast Glass Mosaics, Art-Cast Glass Mosaics, and Art Glass Mosaics. Just as a note: our labels on install imagery include old collection names as this is our transitional year. Please reach out to info@glasstile.com if you have any questions.

OPALS COLOR PALETTE

The Opals palette has seven colors. Each color has its own individual characteristics that include tone-on-tone movement and finish variations. No two sheets are the same; variation will occur within each color and from tile to tile within the sheet. The colors below are shown in our 7/8"x 7/8".

All colors available in both straight and offset.

All Sizes are Nominal

PRODUCT INFORMATION

MINIMUM ORDER QUANTITY

FOR IN-STOCK PRODUCTS

All In-Stock items are sold in full boxes. See the chart below for an overview of our program and please note that you can only order in increments of one box. *Half boxes or individual pieces are not available for purchase.*

Category	Products (Old Collection Name)	MOQ/ Order Increment
Cast Glass Mosaics 	Artisan Edge (Tessera), Clean Edge (Muse), Dimensional Mosaics (Zoetic), Opals	 1 box = 10 sheets
Cast Glass Field Tile 	Field Tile (Elevations)	 1 box = 18 pieces
Art-Cast Glass Mosaics 	Las Playas, Las Islas	 1 box = 10 sheets
Art Glass Mosaics 	Devotion	 1 box = 5 sheets

BLEND CHART

FOR CAST GLASS MOSAICS

The following chart contains the details of each of our color blends found in our In-Stock product offering.

**All blend names with an asterisk indicate even percentages of color components*

Blend Name	Page	Color Components
*Crystalline	16	Oxygen Irid Satin Nalu Irid
*Opaline	16	Pearl Clear Irid Pacific Irid
*Barrier Reef	16	Bondi Irid Pacific Irid Sapphire Irid

¹Tessera is manufactured with an artisan edge; each tile will vary in shape and size and may exhibit some slight edge chipping. It is recommended that the purchaser review an installed and grouted sample board, prior to purchase, to determine the tile's suitability for the intended application.

² Tiles with any edge longer than 5" or trim tile with any edge longer than 2.5" are not recommended for shower floors or submerged applications.

³ The following Devotion colors are NOT recommended for exterior applications: Lustre, Heirloom, Astral, Nocturne, Mercury, Ruby, Gilt and Helios.

⁴ In general, Oceanside Glass & Tile only recommends opaque tile in steam showers. However, in some instances, translucent tile may be used when installed with specific installation materials. For additional information, contact Oceanside Glass & Tile Installation Support at techsupport@glasstile.com or 877-648-8222.

FIREPLACES: We recommend ALL Oceanside Glass & Tile products for use on fireplace surrounds (wall tile) and/or hearth (floor tile only) applications. Oceanside Glass & Tile products are NOT recommended for use inside fireboxes.

SALT WATER POOLS: All Oceanside Glass & Tile products recommended for use in pools (see chart above) are not adversely affected by exposure to salt water and are recommended for use in both fresh water and salt water pools.

Light Residential	Residential flooring areas subject to soft-soled footwear or normal footwear traffic without heavy dirt. Some examples would be: interior rooms such as bathrooms and bedrooms without exterior access.
Residential	Residential flooring areas that are subject to soft-soled footwear or normal footwear traffic with small amounts of abrasive soil. Some examples would be: living or dining rooms.
Heavy Residential	Residential flooring areas that are subject to normal footwear traffic with occasional amounts of abrasive soil. Some examples would be: halls, kitchens and corridors.
Light Commercial	Non-industrial, commercial flooring areas that are subject to normal footwear traffic (less than 50 people per hour) with occasional amounts of abrasive soil. Some examples would be: boutique showrooms and corporate office spaces.

Dynamic Coefficient of Friction Statement

Tiles with Dynamic Coefficient of Friction (DCOF) values less than .42 are not recommended for use on level, interior spaces expected to be walked upon when wet. If such tiles are used as a walking surface where water, ice, oil, grease and/or other substances are present, such a condition could cause a reduction in foot traction and become unexpectedly slippery, resulting in a fall and personal injury. However, this criteria does not apply to shower floors. The suitability of a tile for use on shower floors will be impacted by the format size of the tile, the size and frequency of the grout joints, a lack of footwear during showering and the expectation that the walking surface is wet. Due to the increase in drainage and reduction in the potential to hydroplane provided by a higher number of grout joints and an increase in traction of a bare foot, tiles that are 2" x 2" or smaller, that test below .42 DCOF, may be suitable for use on shower floors. Contact Oceanside Glass & Tile Installation Support for specific tile usage recommendations. See ANSI A326.3 American National Standard Test Method For Measuring Dynamic Coefficient of Friction of Hard Surface Flooring Materials, available at www.tcnatile.com, for additional information.

* Test is only performed on glass tile and does not include test results for glass tile with any one side which is less than 1".

For questions regarding the recommended use and/or installation of Oceanside Glass & Tile products, visit our website glasstile.com/technical-support or contact Installation Support at techsupport@glasstile.com • (877) 648-8222.
