Oceanside Glass & Tile Sealing and Maintenance Guide

Oceanside Glass & Tile installations should be sealed, protected and maintained with Oceanside Products.

For product pricing and availability, contact an Oceanside Products dealer or visit www.oceansideproducts.com. For assistance with product selection or use, contact Oceanside Product Support at 877-648-8222 or info@oceansideproducts.com.

SEALING

● or ● **Sealing**

Glass tile is impervious and does not need to be sealed. However, cement-based grout and natural stone should be sealed to protect against staining. Seal all installations that include cement-based grout or natural stone with either ***Oceancare High Performance Penetrating Sealer*** (natural look) or ***Oceancare High Performance Enhancing Sealer*** (color enriching).

Resealing

To maintain optimal performance, sealers should be periodically reapplied. The recommended period for reapplication will vary by installation location, environmental exposure and maintenance. As a general guideline, tile and/or grout installed in any exterior, wet or high traffic installation should be resealed every 12-24 months. All other installations should be resealed every 36-48 months.

MAINTENANCE

The key to successfully maintaining any tile installation is regular maintenance with a cleaning agent that will not damage the tile or sealer. Food or other spills (coffee, wine, citrus, etc.) should be wiped up immediately. For regular cleaning of Oceanside Glass & Tile products, select the appropriate cleaner from the categories below.

Walls & Floors – Dry Areas

- ***Oceancare pH Neutral Tile & Stone Cleaner***
A non-toxic, biodegradable, all-purpose, no-rinse cleaner designed for daily use on almost any hard surface. Available in ready to use, trigger spray or concentrate formula; when diluted with water, one quart of concentrate will make up to 96 gallons of cleaning solution. Use for regular maintenance, mopping and light-duty cleaning.
- ***Oceancare All Purpose Cleaner & Degreaser***
A 100% natural, plant-derived, citrus-based, heavy-duty alkaline cleaner. Use for spot cleaning stubborn grease, oil and heavy soils.

Showers & Tub Enclosures

● ***Glass & Tile Shield***

An invisible, non-toxic, easy to apply surface protectant that inhibits the bond of calcium and other mineral deposits. Protected surfaces are easier to maintain and most deposits are removed with light brushing or scrubbing. Apply to new/clean shower tile, fixtures and glass shower doors every 12 months.

● ***Oceancare All Purpose Cleaner & Degreaser***

A 100% natural, plant-derived, citrus-based, heavy-duty alkaline cleaner that quickly cuts through soap scum. Use for regular maintenance of tile installed in showers and tub enclosures.

● ***Oceancare Calcium Releaser***

A non-toxic, acid-free cleaner that removes hard water deposits and rust from tile, shower doors and plumbing fixtures. Use as necessary on shower tile, fixtures and glass shower doors.

Caution: may etch some natural stone and concrete.

Countertops

● ***Oceancare Clean & Seal***

An all-natural, biodegradable, powerful everyday cleaner, fortified with the sealing protection of Oceancare High Performance Penetrating Sealer. When used for regular cleaning of sealed natural stone countertops, this product rejuvenates existing sealer and maintains stain protection at optimal levels.

● ***Oceancare pH Neutral Tile & Stone Cleaner***

A non-toxic, biodegradable, all-purpose, no-rinse cleaner designed for daily use on almost any hard surface. Available in ready to use, trigger spray or concentrate formula. Use for regular maintenance and light-duty cleaning.

● ***Oceancare All Purpose Cleaner & Degreaser***

A 100% natural, plant-derived, citrus-based, heavy-duty alkaline cleaner that is safe for agglomerate and natural stone countertops. Use for spot cleaning stubborn grease, oil and heavy soils.

SHOWERS & TUB ENCLOSURES

COUNTERTOPS

Pools, Spas & Water Features

For additional pool tile maintenance information including water chemistry and media-blasting recommendations, refer to the Pool Tile Maintenance Guide available at www.installogt.com

- **Glass & Tile Shield**
An invisible, non-toxic, easy to apply surface protectant that inhibits the bond of calcium and other mineral deposits. Protected surfaces are easier to maintain and most deposits are removed with light brushing or scrubbing. Apply to new/clean pool tile every 6-12 months.
- **Oceancare All Purpose Cleaner & Degreaser**
A 100% natural, plant-derived, citrus-based alkaline cleaner that quickly cuts through body oil, sunscreen and makeup, which can accumulate on pool waterlines. Use for regular maintenance of all types of pool tile.
- **Oceancare Calcium Releaser**
A non-toxic, acid-free cleaner that removes calcium deposits, efflorescence and rust from pool tile. Use as necessary on porcelain, glazed ceramic and all types of glass tile.
Caution: may etch some natural stone and concrete.
- **Oceancare Pool Tile Restorer**
An easy to apply, non-toxic, low VOC surface treatment that adds color and luster to old faded or etched tile in pools, spas and water features. Use on most pool tile types including ceramic, porcelain and glass tile.

Deep Cleaning & Grout Haze Removal

- **Oceancare Intensive Stone Cleaner**
A concentrated, acid-free, non-toxic, biodegradable, intensive cleaner designed for periodic use on natural stone surfaces. Use to clean heavily soiled natural stone and grout.
- **Oceancare Grout Haze Remover & Cleaner**
A biodegradable, non-toxic, acid-free cleaner that removes cement-based grout haze and deep cleans heavily soiled cement-based grouts. Use with porcelain, ceramic and all types of glass tile.
Caution: may etch some natural stone and concrete.
