## live & experience

The addition of cornices between wall and ceiling perfectly finish your rooms and adds style to your decoration. Our flexible hanging system can be easily mounted behind these cornices so they are not visible and do not interrupt your finish. However, they still give you the freedom to decorate your walls however you wish without damaging them with marks or holes.

**CEILING**  
mounted

When wall mounting isn't possible, the Top Rail is one of the ceiling mounted alternatives. This subtle hanging system is ideal to use in combination with recessed ceilings: the Top Rail can easily be mounted on the wooden side strip. This makes the hanging system disappear into the ceiling, making it almost invisible. The hanging wires with hanging hook of your choice can easily be slid into the rail and positioned flexibly to decorate the walls.

A frame or canvas will always hang more steadily if two hanging wires are used. The weight of the frame or wall decoration determines the best hook to use. For heavier wall decorations, the hanging hook with a maximum weight carrying capacity of 15 kg would be perfect. Picture Mouse is a handy and original hanging cord for displaying several documents, such as cards and photos, using magnets on a steel hanging cord. The Sloping Wall Stopper Set is ideal for sloping walls. This system allows you to use a flexible picture hanging system on sloping walls, for example, in a stairwell.
