

MS6000D

VHF-Hi | UHF | Amplified Omnidirectional
Outdoor HDTV Antenna

The MS6000D captures VHF and UHF signals up to 55 miles away—in all directions.

State-of-the-art amplification

The built-in preamplifier boosts the signal right at the antenna, making up for signal loss from long cable runs and splitters.

Clear Circuit Technology

Offers the lowest noise (1 dB typical) to deliver more range and less signal dropout and pixelation.

Discreet, minimalist, and storm-resistant design

Wind tunnel tested at 100 mph, the MS6000D antenna's low-profile design is perfect for condos, apartments, or homeowners' association neighborhoods.

*Multiple mounting options –
vertical/pole or angled*

Mounts included

USAGE SPECIFICATIONS

- Omnidirectional 55-mile range
- High-band VHF: channels 7-13 (174-216 MHz)
- UHF: channels 14-36 (470-608 MHz)

DIMENSIONS & WEIGHTS

- Height: 7.59"
- Diameter: 14"
- Thickness: 1.1"
- Overall length: 19.8"
- Weight: 2.5 lb

IN THE BOX

- MS6000D antenna with integrated preamplifier
- Power inserter
- USB power cable with 110 V adapter
- Antenna mount and hardware
- Printed documentation
