

YA7000D

VHF-Lo | VHF-Hi | UHF
Directional Yagi Antenna

The YA7000D is a **compact Yagi antenna** with a uniform gain curve and increased front-to-back ratio, enabling a range of up to 70 miles.

Simple Setup and Operation

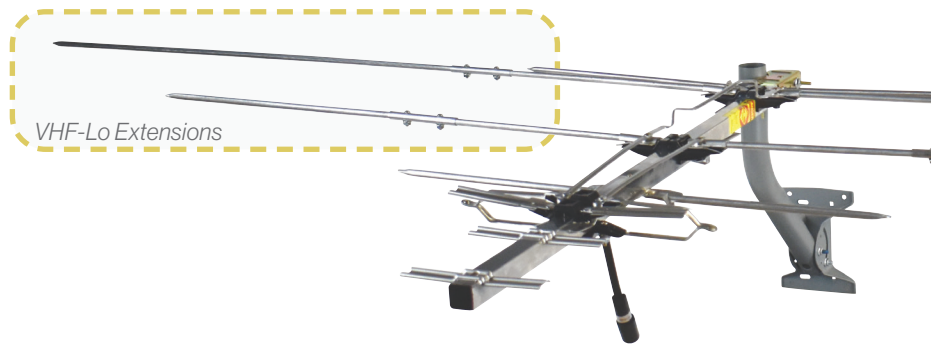

Fold-and-lock elements and added extensions for low-band VHF make for easy setup and mounting on universal mount system.

Built to Last

Classic antenna construction reduces antenna size and wind load while increasing element strength and performance.

Free Winegard Apps

Increased customer satisfaction with the simple to use HDTV Tower Finder App. Augmented reality helps provide the best location for maximum free channel reception.
