➔ Our Health & Wellbeing Mission:

OneUp Rehab Solutions is a New Zealand national distributor of world leading Healthcare, products and equipment.

Proudly servicing the Hospital, Allied Health, Physiotherapy, Podiatry, and Aged Care sectors.

OneUp Rehab Solutions Limited (OURS) was established in 2020 and is a proudly, privately owned and operated New Zealand company, located in Auckland.

Conscious of the fact that New Zealand is often under prioritised on the global supply chain, OURS works closely with various international suppliers to investigate and source the latest global healthcare and rehabilitation products/ technologies and cost-effectively supplies them to New Zealander's.

Our aim is to help customers optimise their mental and physical wellbeing by delivering leading innovation to improve patient outcomes.

➔ Our core focus areas

- **Innovative Product Selection & Development**
- **On-going product training and education, in order to upskill customers and enable optimum use of products within correct applications**
- **Offering cost-effective long term health solutions**
- **Highly qualified and knowledgeable team, readily available to chat through your particular needs**

With years of experience and a strong network throughout the medical and sporting industries, OURS strives to always meet client needs.

We do so by providing unique, cost-effective and innovative products, backed with a dedicated and professional service.

Our mission is to enable New Zealanders to achieve better patient outcomes and provide them with the tools to live functional, meaningful, pain free lives.

01 Patient Handling & Positioning

➔ Trulife

The Trulife range of pressure relieving positioning devices were developed as a result of their commitment to provide improved levels of pressure care for patients and undergoing theatre procedures.

Vast amounts of in-depth research have gone into the development of each range. The Trulife Pressurecare range offers a simple and cost effective solution with a comprehensive offering to cover all surgical procedures.

1. Azure:

Products in the Azure range consist of two independent protective silicone layers that work in combination allowing the moulded products to effectively conform to the individual's shape in a more contoured and less structured manner.

2. Oasis:

The Oasis range is an extensive line of reusable 100% silicone gel pads. The silicone used is softer than both skin and underlying tissue.

3. Oasis Elite:

The Oasis Elite range combines silicone gel and lightweight foam with a pre-contoured surface to provide superior pressure relief and patient protection from decubitus ulcers on the or table.

4. Oasis Plus:

Made from medical grade silicone elastomer, Oasis Plus is the most advanced and innovative range of pressure relieving positioning devices for the OR table, available on the market today. Additional durability is ensured because these products have no outer layer of film.

Trenguard

Products

	<p>TRENGUARD™ 450/600 Procedure Packs</p> <p>TRENGUARD™ 450/600 Procedure Packs The two components included in these single use Procedure Packs are a specifically designed 'speed bump' bolsters and the uniquely shaped head stabilising pillow.</p> <p>They are available in two sizes and attach directly to the Trenguard Patient Support Frame (sold separately).</p> <p>These components are designed to be used in conjunction with the reusable Trenguard HYBRID Lateral Stabilising Pillows (set of two). These Stabilising Pillows are sold separately (see below).</p>
	<p>TRENGUARD™ Lateral Stabilising Pillows</p> <p>TRENGUARD™ Lateral Stabilising Pillows HYBRID versions of Trenguard Trendelenburg Patient Positioning System utilise reusable lateral stabilising pillows. In addition to having a lower procedural cost there is a substantial reduction in medical waste. Available in two sizes.</p> <ul style="list-style-type: none"> • Washable and Reusable. • Can be used up to 150 times before replacement is recommended. • Use with Trenguard Procedure Packs.
	<p>TRENGUARD™ Support Frame & Clamps</p> <p>TRENGUARD™ Support Frame & Rail Clamps</p> <ul style="list-style-type: none"> • Compatible with all Trenguard products. • Secures to table with standard blade clamps (sold separately). • Use with Trenguard procedure Packs to support patients in extreme Trendelenburg up to 40 degrees.
	<p>TRENGUARD™ Integrated Wedge</p> <p>TRENGUARD™ Integrated Wedge For high-BMI (>40) patients and those without a discernible cervical notch, an integrated wedge acts as the "Speed Bump" bolster.</p> <ul style="list-style-type: none"> • Available in two sizes. • Increases the Speed Bump's ability to prevent patient sliding for patients with BMI over 40. • Use with Lateral Stabilising Pillows.

	<p>ARMGUARD™ Patient Arm Protector</p> <p>ARMGUARD™ Patient Arm Protector The best choice for securing patient arms in the supine position.</p> <ul style="list-style-type: none"> • Provides instant emergency access for purging ports and tracing lines. • Simple and easy setup. • Arm compression is easily controlled. • Low profile sleds will not clash with robot arms. • Comfortable for surgeons and assistants.
	<p>FACEGUARD™</p> <p>FACEGUARD™ Face Shield / Instrument Tray protects the patient's face. FaceGuard™ protects the patient while providing a convenient surface for surgical instruments.</p>
	<p>PATIENTGUARD™ Robotic Stirrups™</p> <p>PATIENTGUARD™ Robotic Stirrups™ The only stirrup designed specifically for robotic surgery.</p> <ul style="list-style-type: none"> • Squeezing handle allows manual axial rotation of the control rod up to 100. • Knee adduction and abduction are achievable at the handle. • Lithotomy -35 degrees low and +85 degrees high. • Adduction -9 degrees and abduction +25 degrees.

SnowPac

	<p>SNOWPAC A/A-1/A-1-2 Type</p> <p>Kidney Position, Lateral Position Protector for less pressure on the skin of protruding bones to reduce a patient's ulcer. This helps form the body position during side-position operations such as patients with cerebral palsy, Lou Gehrig's disease, kidney control, and shoulder surgery.</p> <p>SIZE: A Type: 73x100CM A-1 Type: 73x100CM A-1-1 Type: 90x100CM A-1-2 Type: 73x100CM A-1-3 Type: 90x100CM</p>
	<p>SNOWPAC B/B-1 Type</p> <p>Thyroid Position Protector for less pressure on the skin of protruding bones to reduce a patient's ulcer. It is easy to form hyperextension position of the neck during thyroid surgery and prevent discomfort during surgery.</p> <p>SIZE: B Type: 72x88CM B-1 Type: 118x88CM</p>
	<p>SNOWPAC C Type</p> <p>Head Stabilisation Position Protector for less pressure on the skin of protruding bones to reduce a patient's ulcer. It helps to hold head in eye, facial, or dental surgery.</p> <p>SIZE: C Type: 30x40CM</p>
	<p>SNOWPAC D Type (Waist & Ankle Fixed)</p> <p>Supine Position Protector for less pressure on the skin of protruding bones to reduce a patient's ulcer. Supports a splint to prevent lowering of ankle, and helps to relieve back pain in case of long operation.</p> <p>SIZE: D Type: 30x55CM</p>
	<p>SNOWPAC E Type</p> <p>Various Full Body Position Protector for less pressure on the skin of protruding bones to reduce a patient's ulcer. It is possible to form various positions depending on the purpose.</p> <p>SIZE: E Type: 72x165CM</p>

Positioning

Reduces risk of injury when repositioning patients

Additional consultation should be taken to identify suitable applications for use of the Air Transfer Mat

EASIMOVE Air Transfer Mat

EasiMove Air Transfer Mat
EasiMove Air Transfer Mat for patient transfer solutions significantly assists in the reduction of injuries to caregivers, nurses and patients alike.

The Single Patient Use Mat eliminates costs and logistics associated with reprocessing and greatly reduces the risk of cross-contamination.

PRODUCT CODES:
EM-34SPU
EM-39SPU
EM-50SPU

EM-Trolley

EASIAIR Adjustable Air Pump

EasiAir Adjustable Air Pump
EasiMove Air Transfer Mat fits all existing air transfer mat pumps as well as providing it's own costeffective EasiAir Variable Air Pump.

EASY2MOVE SPU Slide Sheets

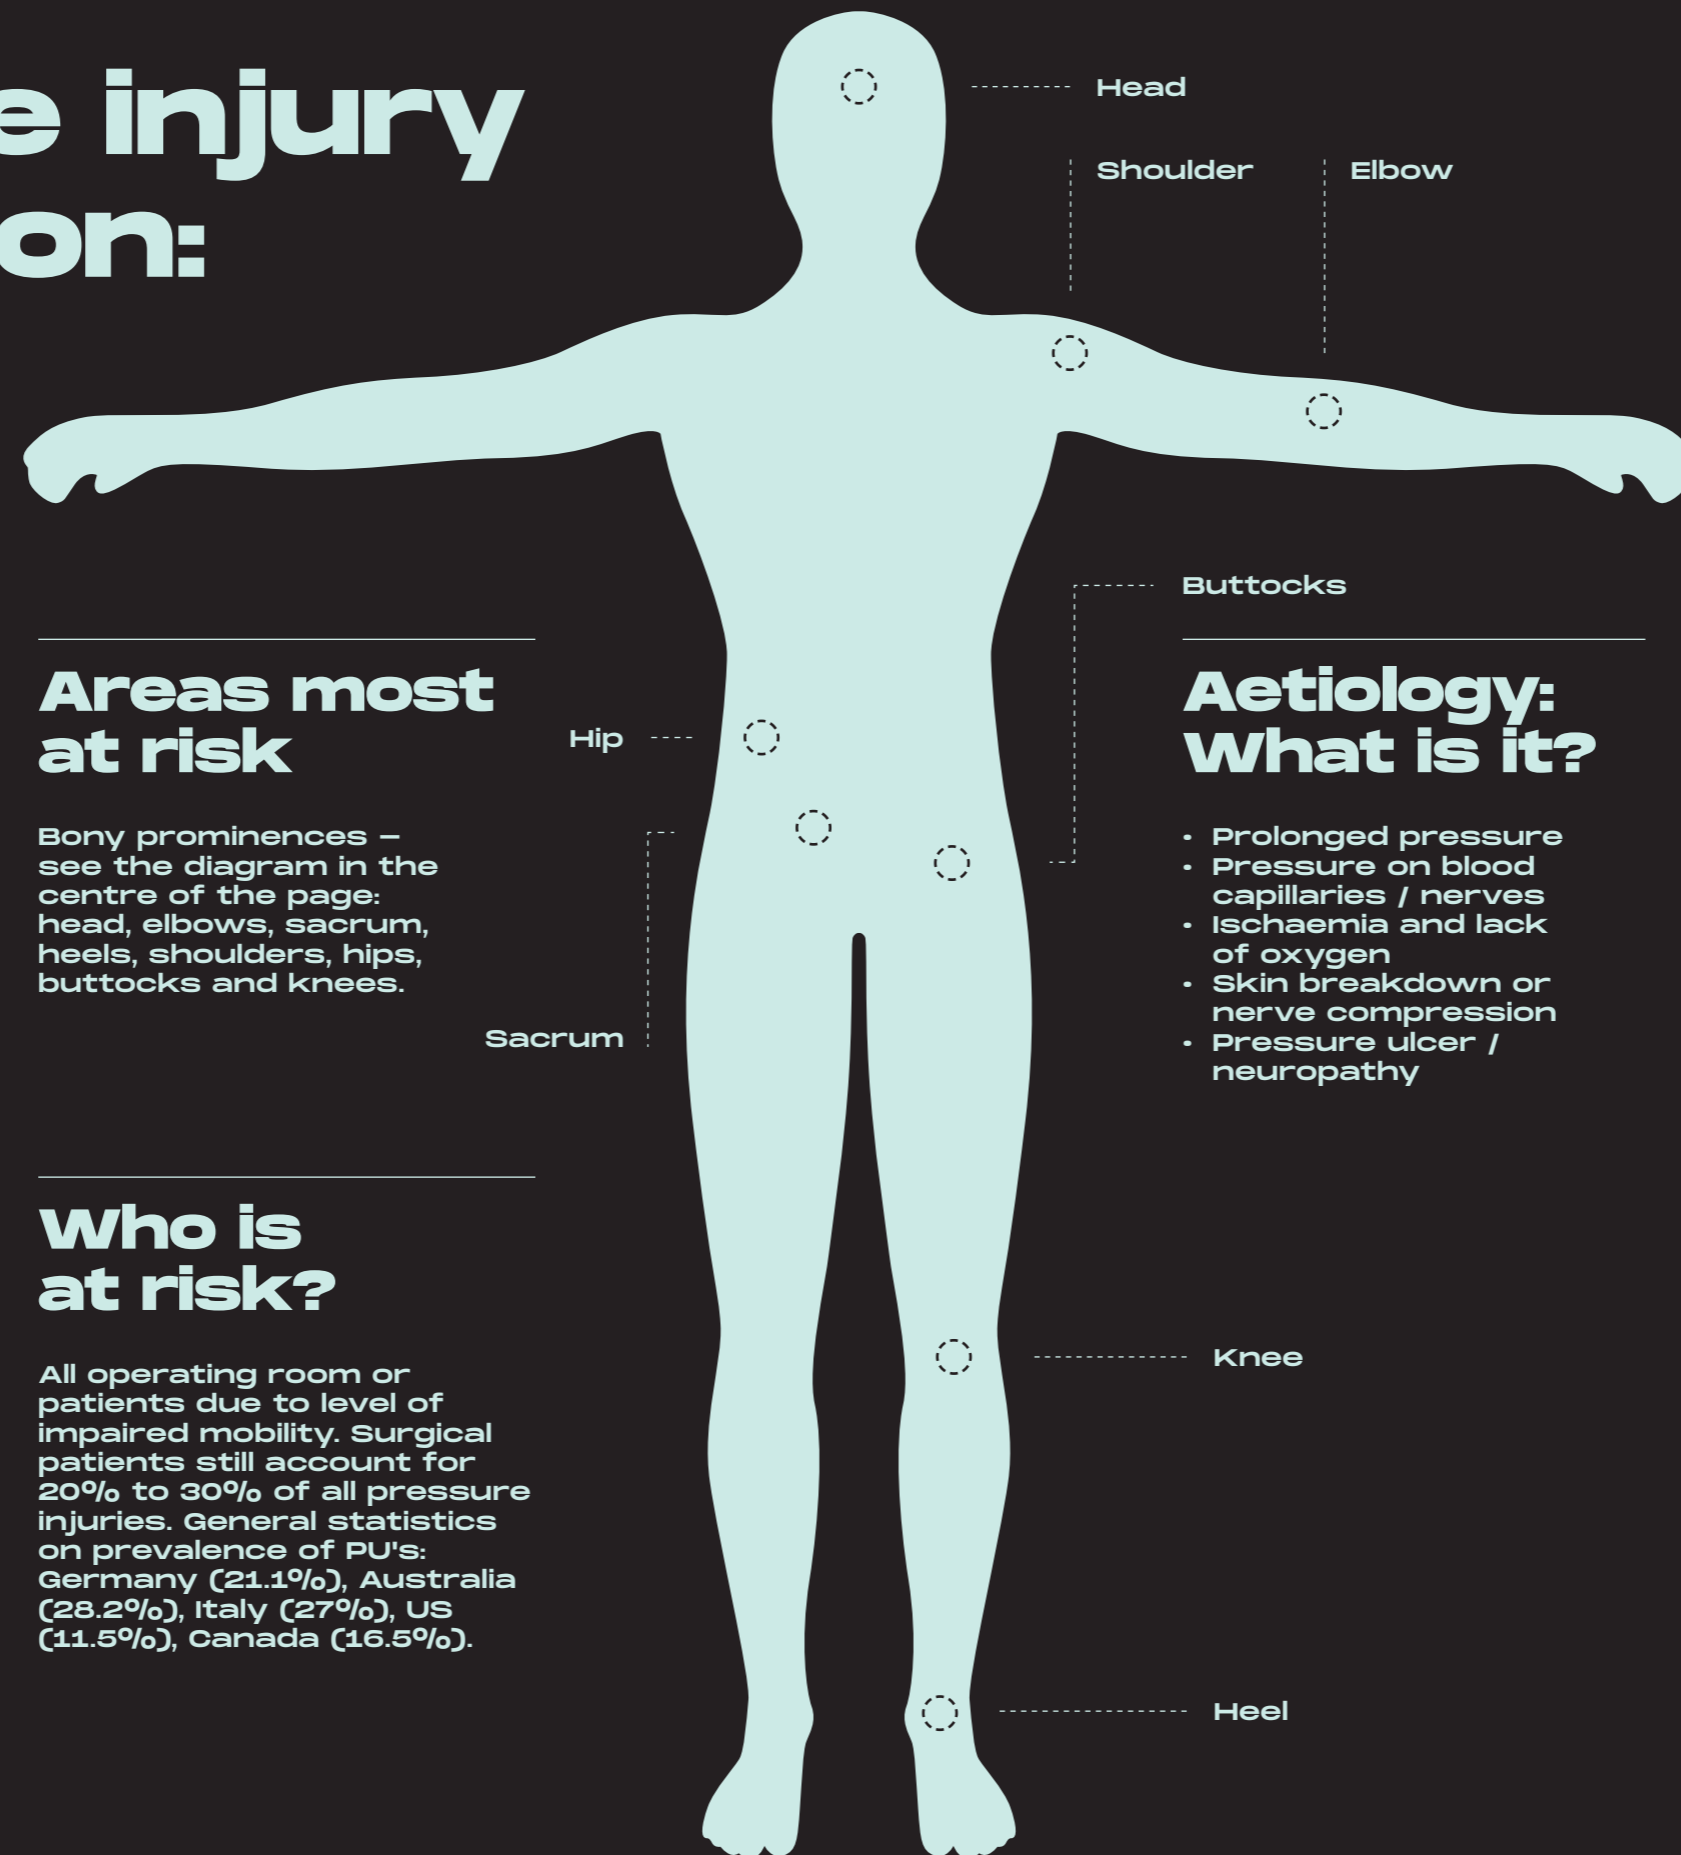

Single person use slide sheets

- Reduced spread of infection
- Significant cost savings
- No laundering costs
- Available in yellow only
- Available in a box of 50 sheets
- Pre-bagged sheets available
- Latex free

02 Pressure Care

Pressure injury prevention:

Pressure Ulcer (PU)

A pressure ulcer is localized injury to the skin and/or underlying tissue usually over a bony prominence, as a result of pressure, or pressure in combination with shear.

Areas most at risk

Bony prominences – see the diagram in the centre of the page: head, elbows, sacrum, heels, shoulders, hips, buttocks and knees.

Pressure Neuropathy

In pressure neuropathy there is excessive pressure on a nerve root or a peripheral nerve leading to ischemia (not enough oxygen due to poor blood supply). If the pressure continues, fibrosis tends to develop.

Who is at risk?

All operating room or patients due to level of impaired mobility. Surgical patients still account for 20% to 30% of all pressure injuries. General statistics on prevalence of PU's: Germany (21.1%), Australia (28.2%), Italy (27%), US (11.5%), Canada (16.5%).

Aetiology: What is it?

- Prolonged pressure
- Pressure on blood capillaries / nerves
- Ischaemia and lack of oxygen
- Skin breakdown or nerve compression
- Pressure ulcer / neuropathy

Safe positioning

- Level of prolonged pressure on bony prominences and nerve endings
- Avoid circulatory and respiratory insufficiency
- Attain optimal surgical position safely
- Facilitates anaesthetist

Pressure Neuropathy

In pressure neuropathy there is excessive pressure on a nerve root or a peripheral nerve leading to ischemia (not enough oxygen due to poor blood supply). If the pressure continues, fibrosis tends to develop.

➔ Levabo Heel Up

Levabo: From zero to pressure relief in less than 60 seconds....

1. Heel Up – Short:

Dimensions:
18X32X25CM (70001)
Heel protector for mobile and seated users, typically wheelchair. Can be used for both prevention and treatment of pressure sores.

2. Heel Up – Medium:

Dimensions:
18X39X25CM (70001)
Heel protector useful for both prevention and treatment of pressure sores. Typically for users with short legs. Most useful for bed-bound patients. It supports the fore-foot and minimizes risk of foot drop.

3. Heel Up – Long:

Dimensions:
18X48X25CM (70001)
Heel protector useful for both prevention and mitigation of pressure sores. Most useful for bed-bound patients. It supports the front foot and minimizes the risk of foot drop.

4. Heel Up – Max:

Dimensions:
18X50X30CM (70001)
Heel Up Max is a heel relief for both prevention and mitigation of pressure ulcers. Most useful for bed-bound patients – applied on patients with a wide foot. It has an extra air compartment under the foot, providing optimal support of the forefoot. The cushion's design has an effect that ensures stability without obstacles in the patient's movement. Heel Up Max is clean, but not sterile.

Levabo All Up

➔ Levabo Turn All®

The Turn All® System turns a standard bed into an automated lateral turning bed.

The new LevaboTurn All® system is developed for acute & home care patients.

The system is designed to support clinicians and carers in the regular turning of primary immobile patients, who are at risk of developing pressure ulcers.

Clinical Efficiency

Several clinical practice guidelines recommend repositioning at least every two hours for immobile patients and elderly people.

Also the 2019 International Pressure Ulcer guidelines (EPUAP, NPIAP, PPIA) recommend the use of the 30° lateral side-lying position.

Easy to Use

Easy to set up, clean and use. Dial sets the timer for operation and the "On/off" button control air flow and alternating pressure feature.

Cycles complete every 90 minutes, turning the patient from side to side 25 – 30 degrees, in each direction.

Control Box

Just power it on – Set the time for lateral turning, and the system is turning the patient. The system gives an audible alarm if power is lost.

Please contact: sales@oneuprehab.co.nz for product SKU's and the full Levabo catalogue. For the Levabo Turn All®, please refer to image X on the opposite page.

A healthcare professional, a woman in a white lab coat, is adjusting a patient's safety straps on a hospital bed. A male healthcare professional in a white lab coat is standing behind her, looking on. The patient is lying in the bed, covered with a light blue sheet. The bed has a metal frame with a curved overhead bar. The scene is set in a hospital room with a wooden headboard visible in the background.

03 Bariatric Care

31%

The New Zealand Health Survey 2019/20 found that close to 1 in 3 adults were obese

45-64 years

From 2011 and 2020, there was an increase in obesity for NZers in this age bracket

Bariatric Care

CLAVIA FCD Chemo / Surgery Stretcher

Clavia FCD Chemo/ LSA Surgery Stretcher
 Ergonomically designed to maximise convenience for staff / patient comfort, the Clavia range of stretchers will be a welcome addition to any Day Surgery, Outpatients' Clinics & Ambulatory Departments.

Features

- Three section mattress support platform
- Mattress – comfortable hospital grade dual layer foam (12cm)
- Removable mattress cover – waterproof
- Easy to clean
- Robust steel frame

- Electrically operated backrest function, with manual CPR release
- Electrically operated Trendelenburg
- Two Linak column actuators electrically raise and lower the mattress platform
- Electrically operated leg rest function
- Hand Control for all electric functions
- Pre-programmed 'one touch' buttons
- One removeable IV pole – 2-stage & hook

BARI Lift & Transfer

Bari Lift & Transfer

The Bari Lift and Transfer™ assists and enhances patient mobilisation while reducing workers' compensation claims associated with patient handling. This transfer system is the most versatile lift system available, designed to help patients out of bed and into a wheelchair or commode chair.

The Bari Lift and Transfer allows lifting from the floor level and creates a safe environment to properly transfer the patient while protecting care providers from injury.

Product Specifications

- Weight: 99kg
- Length: 163cm
- Base back width: 72cm
- Base front width: 84 – 135cm
- Height: 133 – 229cm
- Scales available: Yes
- Emergency release: Yes
- Heavy duty welded steel frame
- Wheels: 2 x double 75mm twin front castors & 2 x 75mm twin back castors
- Safe working load: 455kg

PRODUCT CODE: **BAMD-BARILIFT-340455**

ACUTE Expandable Bariatric Bed

Acute Expandable Bariatric Bed

This robust, high capacity, four section powered profiling bed is ideal for use in any hospital dept involved in the care of bariatric patients. The design features a mattress platform that can be expanded and lengthened, as required, to provide a more comfortable support surface for those bariatric patients of significant size. When combined with the appropriate static support surface or alternating air mattress replacement system, our Bariatric Acute Expandable Bed makes it much easier

for healthcare staff to provide the best possible clinical care. There are two models available, the Bariatric Acute Expandable Bed (BAHE-HBB500) and Bariatric Acute Expandable Bed with Scale (BACA-120765-Scale).

Bariatric

Care

SHUTTLE Advanced Chair – B Series

Advanced Shuttle Chair – B Series

Specifically designed to facilitate the rehabilitation of bariatric patients, the attendant propelled 'Shuttle B Series' recliner effortlessly adjusts from chair to stretcher profile at the touch of a button. With a safe working load of 454kg and a range of other electrically powered profiling functions including 'Seat Assist', Trendelenburg and Reverse Trendelenburg, plus the unique 'Sit to Stand' poles, our Shuttle™ is an essential piece of equipment for any facility caring for non-ambulant patients of significant size. Ideal for use in ICU, Medical and Rehabilitation wards.

Features:

- Ideal for lateral transfers from bed to the Shuttle™ and back again
- Electric height adjustment

- 'One touch' powered adjustment
- Stretcher or Chair upright, with seat assist mode, and recliner
- Trendelenburg & reverse Trendelenburg
- Manually height adjustable arm/leg rests
- Central locking rear swivel castors
- Removable IV pole – stored underneath chair when not required
- Removable 'sit to stand' ambulation poles for right and left side
- Fitted with seat belt to help stabilise patient if necessary
- Storage basket underneath (accessed from the rear)
- O² cylinder Holder mounted

PRODUCT CODE: **BAMD-ASCP**
MAXIMUM WEIGHT: **455KG SWL**

BARI Hi Back Patient Chair

Bari Hi Back Patient Chair

The Bari Hi Back Patient Chair is designed to provide pressure relief for the bariatric patient, plus the option to vary the seat depth and backrest height, for maximum comfort. The seat, backrest and arm support cushions are upholstered in a 2-way stretch, vapour permeable, blue PU fabric with welded seams for improved infection control.

White powder coated steel frame.

Transport wheels fitted to rear legs to reduce effort involved in repositioning or relocating chair.

Product Specifications:

- Seat Height: 44–59CM
- Seat Width: 75
- Seat Depth: 55–65CM
- Backrest Height: 76–86CM

PRODUCT CODE: **BACC-400190**
MAX PATIENT WEIGHT: **400KG SWL**

BARI Drop Arm Commode

Bari Drop Arm Commode features:

- Exceptionally wide seat (93cm between armrests)
- 450kg SWL
- Swing down armrests for improved access when needing to laterally transfer patient
- Designed specifically for the significantly bariatric patient, with robust light grey powder-coated tubular steel frame and the widest seat available
- Durable black PU upholstery on seat, backrest and armrests
- Easily removable backrest for improved access and added convenience when cleaning
- Extra large commode opening, in seat cushion, to assist carers with hygiene tasks

- Streamlined design for easy cleaning
- Includes extra large commode bucket

PRODUCT CODE: **BAMD-DM1132-1**
MAX PATIENT WEIGHT: **450KG SWL**

BARI-CARE Bariatric Wedge

Bari-Care Bariatric Wedge

The Bari-Care Bariatric Wedge consistently and reliably supports a comfortable side lying position for heavy weighted patients.

The unique design utilises an extra-firm core that supports heavier weights and a memory foam topper that optimises pressure redistribution, whilst the non-slip backing ensures it stays in position

Features:

- Highly reliable turning solution for Bariatric / Plus size patients
- Manufactured of a very firm, high density core foam which will hold the torso in a turned position, while resisting the collapsing forces of heavier patient weights
- Layer of high-density visco-elastic foam added to the patient contact

surface, which enhances comfort and pressure reduction where it is needed most

- Ideal way to enhance your pressure management protocols; great for patients with pressure sores
- Non-slip fabric on the bottom of the reusable version prevents the wedge from migrating away from the patient
- This cushion maintains the patient's body position in bed, chair or other piece of equipment

04 Scar Manage- ment

➔ Alhydran

ALHYDRAN is known as a scar cream, but it is much more than that: our cream is effective in relieving many skin conditions.

The powerful moisture-regulating cream ensures optimal hydration, promotes healing of the skin and relieves skin complaints such as itching, dry skin and redness.

The effectiveness has been scientifically proven. As a result of this, the product has been widely used by specialists for more than 15 years.

It is effective for:

- Burn Wounds
- Dry Skin
- Laser Treatment
- Radiotherapy
- Wounds
- Eczema
- Rosacea
- Actinic Keratosis

Alhydran

	<p>ALHYDRAN Hydrating Cream 250ML</p> <p>ALHYDRAN ensures optimal, long-lasting hydration and prevents moisture loss.</p> <p>Ideal for treatment of disrupted skin barrier. Suitable for (after) care of burn wounds, treatment and prevention of scars, treatment of (extremely) dry skin and reduction of redness and itching.</p> <p>How to use: Apply a thin, even layer of cream. Use it three times a day (and when skin complaints increase).</p> <p>ALHYDRAN is hypoallergenic and suitable for all skin types. Not tested on animals.</p> <p>ALHYDRAN contains ingredients such as antioxidants, which protect the skin against free radicals. These unique restorative effects, in combination with optimal hydration and occlusion, ensure that the disrupted skin barrier can recover itself.</p> <p>CODE: 20-20250 CONTENT: 250ML</p>

Scarban

Products

	<h3>SCARBAN Elastic Silicon Sheets</h3> <p>Scarban Elastic is the best choice if you require the most intensive silicone scar therapy. This sheet has an extra-thick silicone layer for optimum hydration of scar tissue, providing maximum support for rapid, itch-free formation in the case of abnormal scars.</p> <p>Benefits of Scarban Silicone Sheet Elastic:</p> <ul style="list-style-type: none"> • Intensive therapy – highly effective • Suitable for small and large areas of skin • Includes very high-level UV protection • Can be cut to fit your application • Includes special cleaning soap <p>SIZES IN STOCK: 5x7.5CM (Qty 2) 10x15CM (Qty 1) 15x20CM (Qty 1) 5x30CM (Qty 1)</p>
	<h3>SCARBAN Light Silicon Sheets (0.4MM)</h3> <p>The Light version is the best choice when the thick silicone layer of Scarban Elastic is too intensive for the skin or when the scar is on a part of the body that flexes (e.g. elbow). Scarban Light is thinner, more flexible and better tolerated by sensitive skin. Scar treatment using Scarban Light may take longer to achieve the same final result.</p> <p>Benefits of Scarban Silicone Sheet Elastic:</p> <ul style="list-style-type: none"> • Thinner and more flexible (ideal for body areas that flex) • Ideal for sensitive skin <ul style="list-style-type: none"> • Includes very high-level UV protection • Can be cut to fit your application • Includes special cleaning soap <p>SIZES IN STOCK: 5x15CM (Qty 2) 5x30CM (Qty 2) 5x7.5CM (Qty 2) 10x15CM (Qty 2) 15x20CM (Qty 2) 10x15CM (Qty 4 – No cleaning soap) 15x20CM (Qty 4 – No cleaning soap)</p>
	<h3>SCARBAN Velvet Touch Silicon Gel</h3> <p>Benefits of Velvet Touch Silicon Gel:</p> <ul style="list-style-type: none"> • Invisible scar therapy • Extremely suitable for small scars (e.g. surgical scars) • Quick-drying – makeup may be applied on top of the gel • Ideal for visible locations like the neck and face • Convenient container with dosage pump • Long-lasting effect – apply only twice per day • Includes special cleaning soap <p>We recommend using Scarban Velvet Touch silicone gel if the scar is visible, e.g. on the face or neck.</p> <p>Treating scars with Scarban: You'll quickly experience the benefits of Scarban products: Complaints such as itching and pain are relieved or disappear within a few days. Visible results are seen within 2-4 months. Your scar becomes more flexible, flatter and less red. Scar formation is reduced/minimized.</p> <p>Remember when treating scars: an early start prevents scar formation!</p>
	<h3>SCARBAN After C-Section Kit</h3> <p>Scarban® C-Section is silicone scar therapy specially developed for C-Section aftercare. In order to reduce or prevent abnormal scarring after a caesarean section, we have introduced Scarban® C-Section. It is a specially pre-shaped silicone sheet which provides optimal and effective scar aftercare.</p> <p>Benefits of Scarban After C-Section Kit:</p> <ul style="list-style-type: none"> • Elastic and self-adhesive • 100% medical grade silicone • Washable <ul style="list-style-type: none"> • UV protection (UPF 50) • For all skin types • Durable in use • Safe and easy to use <p>Scarban After C-Section Kit contains:</p> <ul style="list-style-type: none"> • Scarban® C-Section silicone sheet • Mild silicone sheet cleaning and maintenance soap • Information leaflet with instructions for use

	<h3>SCARBAN Specialised Silicon Sheets</h3> <p>Scarban Specialised Elastic Silicon Sheets</p> <p>Scarban Elastic is the best choice if you require the most intensive silicone scar therapy. This sheet has an extra-thick silicone layer for optimum hydration of scar tissue, providing maximum support for rapid, itch-free formation in the case of abnormal scars.</p> <p>Benefits of the Specialised Range:</p> <ul style="list-style-type: none"> • Intensive therapy – highly effective • Suitable for small and large areas of skin • Includes very high-level UV protection • Can be cut to fit your application <ul style="list-style-type: none"> • Includes special cleaning soap • Available in various sizes <p>SHEETS IN STOCK: Aereola Circle (Qty 2) Nose Packet (Qty 1) Forehead Packet (Qty 1) Face Sheeting Oval Packet (Qty 4) Abdominal Packet (Qty 1) Hand Care Finger Caps Elastic Finger Tape Elastic Webpace Packet (Qty 4) Breast Sheets</p>
	<h3>SCARBAN Hand Care Glove With Fingers</h3> <p>Scarban Hand Care Glove with Fingers</p> <p>Scarban Elastic is the best choice if you require the most intensive silicone scar therapy. This sheet has an extra-thick silicone layer for optimum hydration of scar tissue, providing maximum support for rapid, itch-free formation in the case of abnormal scars.</p> <p>Benefits of Scarban Silicone Sheet Elastic</p> <ul style="list-style-type: none"> • Intensive therapy – highly effective • Suitable for small and large areas of skin • Includes very high-level UV protection • Can be cut to fit your application <ul style="list-style-type: none"> • Includes special cleaning soap • Available in various sizes <p>SIZES IN STOCK: ADULT: SMALL / MEDIUM / LARGE / X-LARGE KIDS: SMALL / MEDIUM / LARGE / X-LARGE</p>
	<h3>WOUND Natural Wound Spray</h3> <p>WOUND Natural Wound Spray</p> <p>Wound is an innovative, 100% natural wound spray for daily use. The spray is suitable for acute and chronic wounds, the wound edge and the periwound. Wound spray is a patented technology.</p> <p>WOUND wound spray is an "all-in-one" wound healing product, consisting of a specially formulated, synergetic combination of neem oil, St. John's wort oil and olive oil.</p> <p>WOUND is suitable for the treatment of abrasions and cuts, burns, poorly healing wounds and skin defects in skin diseases.</p> <p>How to use WOUND Natural Wound Spray: Spray WOUND in two layers from a distance of 5-10 cm onto the area of skin that has been cleaned with clean water so that a clear film of oil is visible. Let the oil film set for a minute.</p> <p>If necessary, cover the affected skin area with a simple plaster or a fleece compress and fix it if necessary.</p> <p>Repeat the application every 24 hours until the wound has closed. WOUND spray can be used several times a day if required.</p>

Bapscarcare

	<p>BAPSCARCARE T Silicon Sheet</p> <p>Extra thin silicon dressing (0.3mm) Bapscarcare T is a self-adhering, thin, transparent silicone sheet for treatment of old and new scars. Due to the flexibility, the self-adhesive bandage remains securely in place on all areas of the body to be treated. Suitable for use under clothing.</p> <p>The T Silicon Sheet can be used for:</p> <ul style="list-style-type: none"> • Treatment and prevention of abnormal scars (hypertrophic and keloid) • Treatment for burn scars • Treatment surgical scars <p>How to use Bapscarcare T Silicon Sheet:</p> <ul style="list-style-type: none"> • Before use, cleanse the skin & let it dry • If necessary, the bandage can be cut to size • Cover the scar up to approx. 2 cm around healthy skin • Each sheet can be used for 5-7 days (10 pieces per pack) <p>CONTENTS: 10 PIECES SIZES IN STOCK: 5x7CM / 5x30CM / 10x15CM</p>
	<p>BAPSCARCARE S Gel Sheet</p> <p>Thick silicon sheeting (1.2mm) Bapscarcare S is a self-adhesive, thick, washable, transparent medical silicone dressing for the treatment and prevention of abnormal (hypertrophic, keloid) scars.</p> <p>Because of the flexibility of Bapscarcare S, the self-adhesive bandage remains securely in place on all areas of the body to be treated.</p> <p>Bapscarcare S is suitable for use under clothing and compression therapy. The bandage can be used for several weeks.</p> <p>Benefits of the Bapscarcare S Gel Sheet:</p> <ul style="list-style-type: none"> • Thick and comfortable • Completely transparent • Rounded edges – easy to cut • Easily washable • Dries quickly <p>CONTENTS: 2 PIECES SIZES IN STOCK: 5x20CM (QTY2) / 10x15CM (QTY2) / 15x20CM (QTY2)</p>
	<p>BAPSCARCARE Gel 10G – SPF40</p> <p>Bapscarcare Gel SPF40 Has sun protection factor 40, which protects the scar against harmful UV-rays. The Gel provides increased hydration in the epidermis (top layer of skin). The increased hydration ensures that a scar is prevented or recovers more quickly and that symptoms are reduced.</p> <p>Bapscarcare Gel SPF40 can be applied anywhere on the skin and is ideal for treating scars on the face, neck, joints and skin folds. The gel is enriched with vitamin E.</p> <p>How to use Bapscarcare Gel:</p> <ul style="list-style-type: none"> • You can start treatment as soon as the wound has closed • It can be applied to existing scars immediately • Clean and dry the skin before use • Use the gel twice a day • Reapply it after exercising, showering or bathing
	<p>BAPSCARCARE Gel 20G</p> <p>Bapscarcare Gel Bapscarcare Gel ensures that scars become flatter, more supple and thinner. Complaints as persistent redness, itching, restriction of movement at joints, discomfort and cosmetic concerns are reduced.</p> <p>The gel can be used for old & new scars:</p> <ul style="list-style-type: none"> • Treatment and prevention of abnormal scars (hypertrophic and keloid) • Treatment for burn scars • Treatment surgical scars <p>How to use Bapscarcare Gel:</p> <ul style="list-style-type: none"> • You can start treatment as soon as the wound has closed • It can be applied to existing scars immediately • Clean and dry the skin before use • Use the gel twice a day • Reapply it after exercising, showering or bathing

05 Aged Care

➔ Raizer® II

The battery-operated mobile lifting chair Raizer II helps a fallen person up to an almost standing position in a few minutes.

The aid can be operated by only a single assistant, and it requires only limited physical effort from the operator aside from a helping hand.

The Raizer® II is a mobile auxiliary aid to lift a fallen person. It is comfortable and secure for the fallen person, helping both the fallen person and helper to feel safe.

Lifting up to 150kg, there is no risk of overload for the person helping. The Raizer® II has battery capacity for approximately 80 lifts per charge, with a battery indicator on the control panel.

With an intuitive sound and light indicator for smooth assembly, it is easily assembled in a few minutes. The Raizer® II is easily transported in just two bags.

Dimensions:

WEIGHT: 150KG
WIDTH: 69CM
DIAMETER: 26CM
HEIGHT: 19CM

06 Infection Control

→ Hygenica

Introducing a new standard of antimicrobial protection, by harnessing the power of Fantex® to improve patient safety.

Fantex® is a unique antimicrobial agent that acts quickly and effectively to kill a wide variety of bacteria, viruses and fungi, providing safe and long lasting surface protection.

Fantex® has undergone rigorous independent testing to demonstrate its speed, breadth and longevity of active action.

Many leading hospitals have successfully adopted Fantex® infection prevention technology to improve standards of patient care.

1 Minute Kill:
Fantex® rapidly kills pathogens

Log 5 Efficacy:
Eliminates up to 99.99% of pathogens

Broad Spectrum:
Potent against bacteria, viruses and fungi

Residual Activity:
Provides long-lasting surface protection

Infection Control

HYGENICA Antimicrobial Curtains

Hygenica Disposable IPC Curtains are manufactured from non-woven polypropylene and treated with Fantex® antimicrobial, a broad-spectrum disinfecting agent that has rapid and potent efficacy against bacteria, viruses and fungi. Fantex® remains active for the lifetime of the product.

Features:

- Kills 99.9% (Log 3) of bacteria in one minute to BS EN ISO 20743
- Hygienic, polypropylene fabric
- Cost effective alternative to linen
- Eco-friendly and 100% recyclable
- Clear date labelling
- Rapid changeout to increase patient throughput
- Fire retardant to BS 5867 and NFPA 701

ECOMED Eyelet-Fit Disposable Curtains

EcoMed antimicrobial and flame retardant disposable cubicle curtains are the quick, economical and hygienic alternative to conventional cubicle curtains. EcoMed disposable curtains are made from 100% polypropylene, weighing far less than conventional curtains and so are easy and quick to fit and replace in less than 60 seconds.

EcoMed silver antimicrobial additives are not a spray-on, but built into the polymer structure of the non-woven fabric at the point of manufacture. The antimicrobial effect will last until the end of curtain's useful life and until recycled.

Features:

- Designed to be fully compatible with existing popular tracks
- Pre-pleated and when not in use can be folded back into a much smaller stack
- Hygienic, polypropylene fabric
- Eco-friendly and 100% recyclable
- Clear date labelling
- Rapid changeout – less than 60 seconds

CODE: **ICEM-EF-LGMBBX5**

KWICKSCREEN Air / Pro / Duo

Features:

- Full Extension up to 3m (Air & Pro) & 6m (Duo)
- Retracts easily into its protective casing
- 180-degree range of movement
- Create a Covid secure space, anytime, anywhere
- Easy to clean and maintain – panels are easily wipeable and compatible with all standard cleaning products
- Single touch point of use – for ease of clean and to reduce cross-infection
- Custom brackets – adjustable to any height to fit around plug sockets and other wall obstacles
- Minimal dirt traps – ensuring that the screen does not harbour germs
- Easy assembly
- Fire safe – compliant with international fire safety regulations
