

FEATURES

SANDY

"Love it! My husband has a sleep disorder and it gives us peace of mind that he will not fall off the bed. It is very well made, easy to put together. I love the adjustable length also."

VIRGINIA

"I got this for my father when he fell out of bed one night. He LOVES it! What a life saver. Now it helps him all the time get out of bed safely, in addition to keeping him in the bed at night!"

With the Sleep Safe Bed Rail you can sleep easy knowing you have the support you need. It offers stability while standing, and can be extended to prevent night time falls. It also pivots down and out of the way when not in use to maintain the comforting feeling of your bedroom.

HELPFUL TIP: Did you know that the second most common place for falls is in the bedroom, and most of those falls occur while you are sleeping? The extending feature of the Sleep Safe Home Bed Rail can help prevent those falls.

FEATURES

FALL RISK

- 6 out of every 10 falls happen at home, where we spend much of our time and tend to move around without thinking about our safety.
- Every 11 seconds, an older adult is treated in the emergency room for a fall.
- Falls are the most common cause of trauma-related hospital admissions for older adults.
- Falls result in more than
 2.8 million injuries treated
 in emergency departments
 annually, including over 800,000
 hospitalizations.

According to "Fall Prevention Facts" from www.ncoa.org

"Home is a place you grow up wanting to leave, & grow old wanting to get back to"

-John Ed Pearce
