

SLIPCOVER YARDAGE CHART

A slipcover is a fitted protective cover made of fabric that may be slipped on and off of upholstered furniture. It can be tailored to fit snugly or loosely, depending on your taste. Slipcovers can be removed and cleaned for seasonal usage or a change in décor. Some people order furniture upholstered in plain muslin with the intention of using slipcovers only.

The following slipcover yardage chart is provided to give you an estimate of how many yards you'll need to slipcover your furniture. If you're working with a slipcover professional, we suggest you contact him/her for their recommended amount. Yardage amounts are estimates and we offer this information to accommodate our customers. We are not responsible for discrepancies in yardage.

FURNITURE STYLE	NO SKIRT USING FABRIC WITH REPEAT	WITH SKIRT USING FABRIC WITH REPEAT
6 ft sofa with 1 or 2 or 3 removable cushions	16	18
