COLD WATER THERAPY

USER MANUAL

A man with short, light brown hair and a light beard is relaxing in a dark-colored hot tub. He has his eyes closed and a calm expression. The hot tub is situated on a balcony or terrace with a glass railing. In the background, there are blurred green plants and a building. The overall lighting is soft and warm, suggesting an evening or indoor setting with warm lights.

TRUST THE PROCESS

We always end up
right where we are
supposed to be,
right when we are
meant to be there.

Sometimes we just
need a little time
to recover.

2. Go to our website to register and activate your LUMI warranty.
3. Complete the steps in the QUICK START GUIDE.

CUSTOMER SUPPORT

If you have any questions about setting up or using your LUMI product, please visit our website for further information, faqs, troubleshooting and customer support.

WARNING

ELECTRICITY IS VERY DANGEROUS, IN ORDER TO PREVENT ACCIDENTS OR DEATH PLEASE PAY ATTENTION TO SAFETY AND ENSURE YOU FULLY READ THIS INSTRUCTION MANUAL BEFORE USE.

1. During and after transportation, the LUMI chiller unit must stay upright on a stable surface at all times.
2. After transportation, and before use, the LUMI chiller must be left for 24hrs for the refrigeration gas to settle.
3. Make sure there are no water leaks from the LUMI chiller unit, or inlet and outlet pipes when connected to the Recovery Pod PRO.
4. Make sure the LUMI chiller unit is plugged into an AC socket or extension cable that is suitable for use, properly grounded, has a built in surge protector and preferably is IP65 rated.
5. Ensure the LUMI chiller unit is kept dry at all times, do not immerse, splash or spray the unit with water. If the unit does get wet, unplug it immediately and do not use.
6. Never leave the LUMI chiller unit switched on when using the Recovery Pro PRO, always ensure the unit is switched off during your cold water therapy session.
7. If the LUMI chiller unit stops working or doesn't work when switched on, unplug it immediately and do not use.
8. We accept no responsibility for misuse or failure to use this equipment safely as instructed.

Disclaimer: It is not possible for LUMI Therapy to warn the user about every possible danger related to use of an ice bath or chiller unit for cold water therapy. The user must always use their own common sense and good judgement when using an ice bath.

QUICK START GUIDE

ASSEMBLE YOUR LUMI ICE BATH

1. Unpack and place your LUMI ice bath on a stable surface.
2. Inflate both the ice bath body and top lid using the supplied pump.
3. Ensure the pump is fully inserted into the valve, and pump until fully inflated - recommended maximum pressure 8 PSI (0.55 Bar).
4. Once inflated, seal the valves using the safety caps.
5. If you are using the LUMI ice bath with an external LUMI chiller unit, place the chiller unit on a stable surface at least 1 meter away from the ice bath.
6. Connect both the Inlet and Outlet pipes and ensure all valves are 'hand tight'.
7. Fill your LUMI ice bath with 'cold water' using a hose until the water is roughly 15 cm (6 inches) below the top (or approx. $\frac{2}{3}$ full to account for water displacement).

HOW TO EMPTY YOUR LUMI ICE BATH

1. If you are using the Recovery Pod PRO with the LUMI Chiller Unit, please ensure the LUMI Chiller Unit is switched off and unplugged before draining the water.
2. Unscrew the 'Water Out' drain plug to let the water drain out.

THERMO LID

This high quality insulated lid is designed to add a thermal bridge between the ice bath water and the external elements, keeping the water at a steady temperature.

FULLY INSULATED

Both the body of the bath and the lid are insulated, keeping the outside weather from affecting the internal water temperature.

PLUG & PLAY

Quality built hoses easily connect between the chiller and the Lumi Recovery PRO Barrel, circulating fresh, clean, cold water.

FITS 2 PEOPLE

The Recovery PRO bath is perfect for couples or friends who want to experience the chill together, or simply for you to enjoy a spacious dip.

DURABLE CONSTRUCTION

The Recovery PRO is made with ultra durable fibreglass reinforced skin-friendly PVC, which is easy to clean.

miniULTRA™ chiller (optional extra)

The LUMI miniULTRA™ chiller is the industry's best compact ice bath chiller and filtration combination. Quality construction, low maintenance, keeping the water clean with a changeable particulate filter, chilling the water down to 3°C (37°F).

*LUMI miniULTRA Chiller™ optional extra.

COLD WATER THERAPY

HOW LONG SHOULD YOU STAY IN COLD WATER?

Cold water therapy works best with the right combination of time and temperature. For example, if you are in water with a temperature of 10°C, we would recommend you stay for no more than 10mins.

Temperature to Time examples:

- 1°C = 1 minute submersion
- 2°C = 2 minutes submersion
- 3°C = 3 minutes submersion
- 5°C = 5 minutes submersion
- 10°C = 10 minutes submersion
- 15°C = 15 minutes submersion

SAFETY & USAGE NOTES

MAINTENANCE, CLEANING & STORAGE

- Before using your LUMI ice bath for the first time, please wash with **warm soapy water**, rinse and wipe down with a clean dry cloth.
- **Never** clean your LUMI ice bath with a strong bleach-based detergents, as this may degrade the materials and waterproof seals.
- To empty your LUMI ice bath, use the 'Water Out' drain plug. Take care with the drain tap, don't force it and make sure turn it to the closed position after use and clean it regularly.
- Though not essential, to ensure a long service life and for hygiene purposes, we recommend draining, cleaning and drying your LUMI ice bath every two to three weeks.

SAFETY INSTRUCTIONS

- Your LUMI ice bath can be filled with cold or hot water **up to 50°C**. Always start filling with room temperature water, adjusting to your desired temperature as the LUMI ice bath gets closer to full.
- **Never** fill your LUMI ice bath more than $\frac{2}{3}$ full to compensate for your body mass and displacement of water when you enter. So it's always best to start $\frac{1}{2}$ full and adjust afterwards.

PRODUCT SPECIFICATIONS

Dimensions

150cm length

78cm width

70cm height

Specifications

Ultra Durable Fibreglass Reinforced Skin-Friendly PVC

Solid Wall and Insulated Construction

High Pressure Structure - Max 8 PSI / 0.55 Bar

480 litre capacity

15kg weight (empty)

480kg weight (full)

Suitable heights up to 6'7" (2.1m tall)
