

NANO SELF CLEAN

## Nanotechnology Products

### Installation and Care Instructions

#### Application:

To apply your touch surface

1. Make sure the surface that you are applying the touch point to is dry, clean and free from grease.
2. Peel off the backing of the label
3. Align your sticker to the surface you wish to apply, then attach.
4. The sticker can be removed and reapplied if necessary but try not to do this to many times as it will stop the adhesive working properly.
5. To activate wipe a damp cloth over the surface.

#### Care:

Important steps to carry out on a regular basis:

1. Clean your touch points twice a day during normal cleaning operations this will insure the Silver Ions are continuously released through out the day, protecting at all times.
2. All types of cleaning sprays can be used on the surface (Do not use bleach)
3. Do not try to remove your sticker and reapply after a period of time.
4. When the adhesive starts to wear on your touch point and it is no longer sticking to the surface its time to replace it.

#### Questions & Answers:

1. How long will the touch surface last for? - The touch point will last up to 6 months depending on how often it is touched, the adhesive can start to wear off after this period.
2. Will the touch point adhere to anything? - The sign will adhere to most surfaces.
3. Does Silver come off the touch points? - The silver is released over a very slow process and in very small amounts and is completely safe.
4. Are the Touch points recyclable? - Yes they are made of PVC Vinyl
5. Can the touch surfaces get dirty? - Yes the touch surfaces can get dirty the surface does not stop dirt it stops microbes.
