

# STRAW REPLACEMENT

## cutting guide

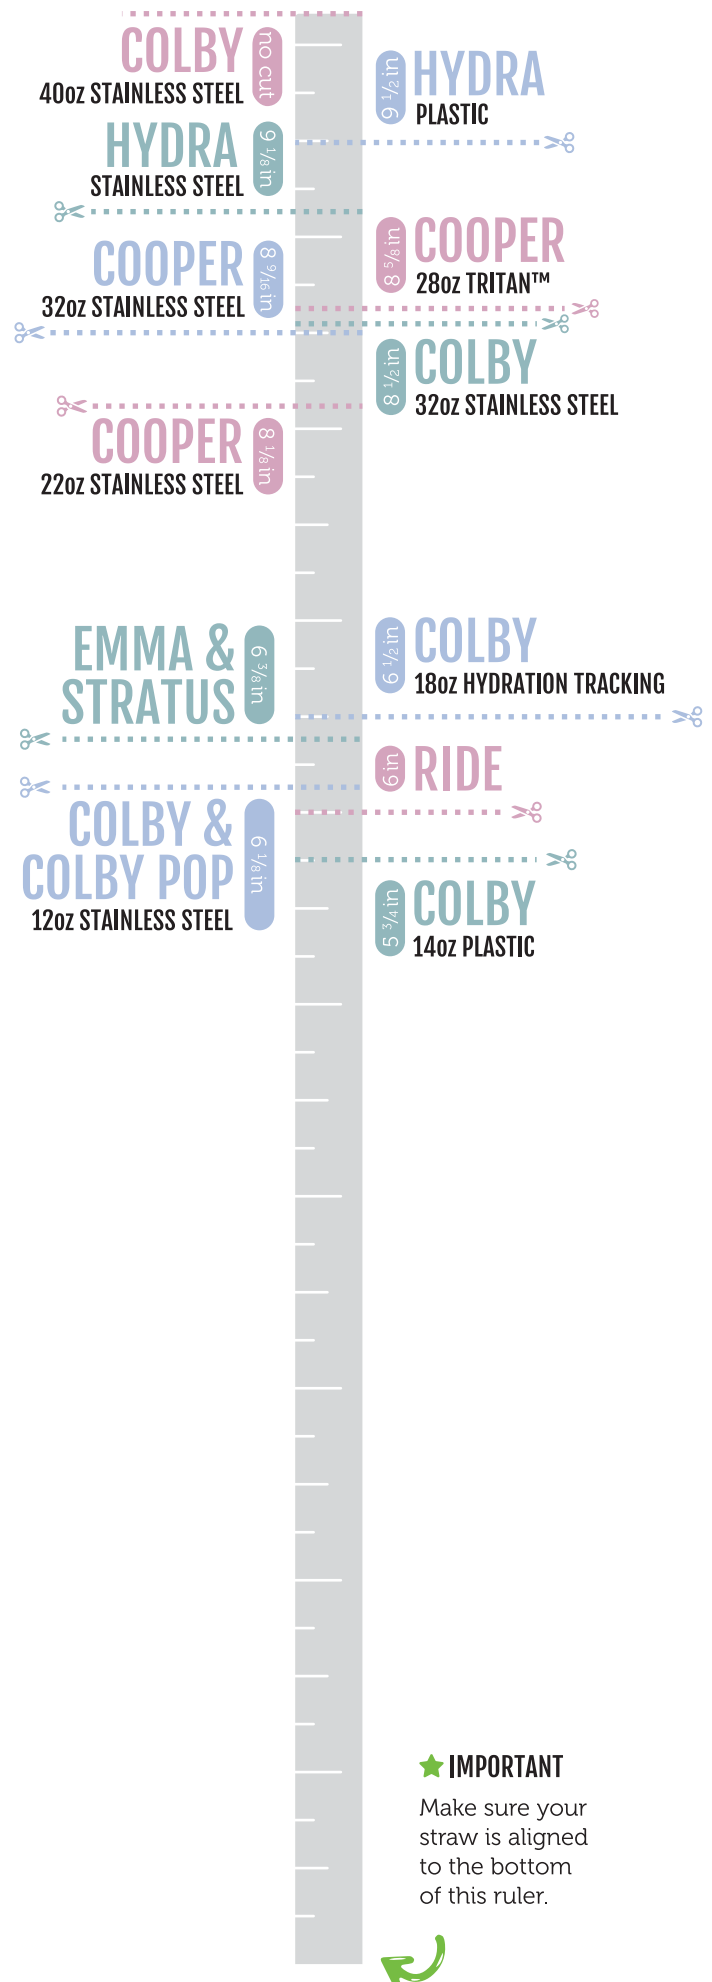

A typical Ello replacement straw is 10.5" long and has a .35" diameter. From there it can be trimmed to fit almost any Ello product you can think of! Not sure how to trim your new replacement straw? Don't worry! Use the steps below to help get the perfect fit!

## 5 EASY STEPS

- 1 Identify the name and capacity of your product (check the bottom sticker or [elloproducts.com](http://elloproducts.com))
- 2 Line one straw up with the bottom of the gray cutting guide
- 3 Mark where you need to cut the straw
- 4 Using scissors, trim straw to correct length for your Ello product
- 5 Voilà! You're done!

\* If you've lost your straw, forgotten the name of the product, or don't see the size on this packaging, feel free to email us a picture of your bottle and we will let you know where to cut the straw!
