

200E XRS (Fuel Injected)

The TrailMaster 200E XRS is an upgrade from the 150XRS, one of our best-selling adult models. The 200E XRS has a bigger 169cc GY6 engine equipped with EFI. With fuel injection, users don't need to worry about starting in cold weather or at high altitudes; furthermore, users don't need to fix or replace carburetors after periods of inactivity with the unit. It's packed with great features like a stainless steel performance muffler, rack and pinion steering and adjustable steering wheel, side mirrors and a bikini sunshade top for those sunny days on the trails!

The buggy also comes with bucket seats and five-point safety harnesses. The driver's seat is adjustable from 36 to 43 inches from the back of the seat back to the pedal so it can fit any size driver. The kart's beefy steel wheels feature 20X7-8 front & 21X10-10 tires rear and ride on adjustable heavy-duty shock absorbers and a 4-point rear swing arm for enhanced off-road handling. F&R Hydraulic disc brakes provide huge stopping power. Extra amenities include a parking brake, H&L beam head lights, all-around fenders, trailer hitch and large utility rack.

We have this model in red and blue
