From a wooden dental stick to relief for dry mouth

What you are holding in your hand is more than a product catalogue; it's a chronicle of innovative TePe products since 1965, with the latest additions being the toothpaste and products for dry mouth.

Flick through almost 60 years of history of helping people lead healthier lives.

The same dedication, ingenuity and collaborative spirit as Henning Eklund demonstrated

when creating our first product, the wooden dental stick, is present in everything we undertake, initiate and create. All for promoting good oral health.

Since the start of TePe, the company has been working closely with us dental professionals to make high-quality products that are affordable, efficient and safe for daily cleaning. Thorough daily cleaning is key for a healthy mouth, and during the treatment phase of oral diseases, it is needed for the mouth to become healthy again. It also helps prevent oral disease recurrence. Last but not least, a healthy mouth is important for every person's general health."

Michaela von Geijer

Michaela von Geijer
Doctor of Dental Surgery
TePe HQ, Sweden

We care for healthy smiles, and a healthy planet

Good oral health is beneficial not only on an individual level, but also for society and the planet as a whole. By promoting good oral health we can also contribute to taking social responsibility. That's why sustainability is so closely integrated in everything we do.

Speaking of products and production. Most TePe products are made with materials from renewable sources and produced using 100% renewable energy. We also strive to reduce greenhouse gas emissions and aim for circularity, not just in our operations, but also throughout product life cycles*.

As dental professionals, you make important choices for your patients every day – and we are here to support you and exchange ideas. Together, we can continue the development of new and more sustainable solutions. Let us know what you think!

*LCA with respect to greenhouse gas emissions from purchased materials for self-produced products and packaging and conducted 2020-2022 in accordance with ISO 14040:2006 and ISO 14044:2006

1. TePe sources 100% raw materials for the toothbrush- and interdental brush handles, as well as the flosser, tongue cleaner, travel case, cap and extra grip, from either renewable feedstock** or certified renewable sources via the mass balance approach, the latter independently certified by the International Sustainability and Carbon Certificate PLUS (ISCC PLUS).

** TePe Choice™ toothbrush, made with a reusable wooden handle, and TePe GOOD™ Mini Flosser handle made with materials sourced from sugar canes.

Interdental cleaning is fundamental as a tool for maintaining a healthy smile. A special focus on interdental cleaning will keep the gaps gleaming. We offer a variety of interdental products for every person and type of gap.

1

Interdental cleaning

Plastic coated wire and rounded tip for safety and comfort.

Ergonomic handle for a stable grip.

Plastic sourced from renewable materials.

The plastic cap can be used for hygienic protection or to extend the handle.

TePe Interdental Brushes

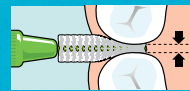

According to studies, interdental brushes are the most effective tool for removing dental plaque between teeth. We have developed our brushes in collaboration with dental experts to certify the highest functionality, comfort and quality.

The wide TePe Interdental Brush range offers an option for everybody – multiple sizes, two

bristle textures and two handle lengths with a straight or angled brush head.

The brushes comply with the international standard for manual interdental brushes (ISO 16409) which stipulates nine sizes, 0-8. We offer colour-coded brushes in all nine sizes to cover the wide span of interdental space varieties.

Original									
Extra soft									
Angle									
Colour	Pink	Orange	Red	Blue	Yellow	Green	Purple	Grey	Black
ISO size (0-8)	0	1	2	3	4	5	6	7	8
PHD (mm)	0.6	0.7	0.9	1.1	1.3	1.6	2.0	2.6	3.4
Wire size (mm)	0.4	0.45	0.5	0.6	0.7	0.8	1.1	1.3	1.5

The measurement between the dotted lines shows the smallest hole which the brush can pass through, passage hole diameter (PHD), using a clinically relevant force.

TePe® Interdental Brush Original

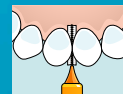

- The user-friendly handle offers a stable grip which enables cleaning with controlled movements.
- The bristles cover the entire wire for safe and gentle cleaning.
- The smaller brush sizes (0-3) have a flexible neck for increased durability and access. The larger brush sizes have a thicker, bendable wire.

Smaller sizes: Curve the flexible neck for access between the posterior teeth.

Interdental cleaning.

Larger sizes: Curve the wire for access between the posterior teeth.

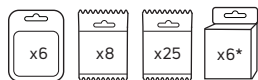

Furcations.

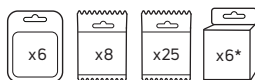

TePe® Interdental Brush Original is also available in a mixed pack.

TePe EasyPick™

- Easy and effective way to clean between the teeth.
- Overlapping, conical sizes to fit all interdental spaces.
- The unique lamellae allow for a wide contact area.

Flexible and durable with a non-slip grip.

Silicone coating with wide lamellae.

Long working length.

Ideal on the go

A handy pocket case for TePe EasyPick™ is included for easy cleaning on the go.

TePe EasyPick™

Colour: Orange
Size: Extra Small/Small

Colour: Blue
Size: Medium/Large

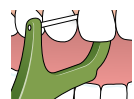

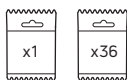

Colour: Purple
Size: Extra Large

TePe Mini Flosser™

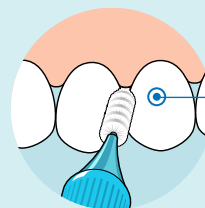

- Pre-loaded dental floss holder for easy and convenient use in narrow spaces.
- Strong, thin, teflon free floss.
- Handle made from sugar cane and wood fibres.
- Bite plane for safe and gentle insertion.

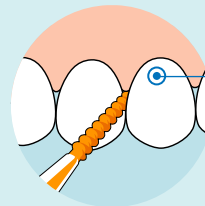

Insert the floss by gently biting onto the bite plane.

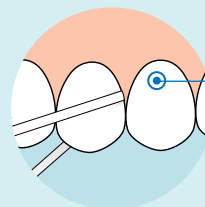

Recommending the correct interdental cleaning device

Individuals with spaces between teeth benefit the most from interdental brushes, which effectively clean the concave and irregular proximal area.

TePe EasyPick™ is a good choice for healthy proximal sites, in the case of gingivitis, and as an on-the-go alternative for everyone.

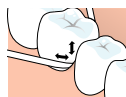

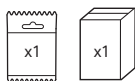

Floss is recommended for tight, healthy proximal sites, where an interdental brush will not fit.

TePe® Dental Floss

Length: 5 m / 40 m

- The expanding floss adapts itself to the dental space and suits different gaps.
- Slides easily between teeth without shredding due to the vegetable wax/avocado oil coating.
- Floss made from recycled water bottles.
- Fresh mint flavour.

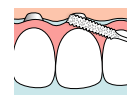

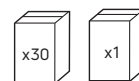

Gently move the floss along each tooth surface.

TePe® Bridge & Implant Floss

Amount: 30 pcs

- Spongy, flexible floss with stiff ends for easy insertion.
- For daily cleaning of implants, bridges and orthodontic appliances.
- Intended for one-time use.

Implant-supported bridge.

Practice Box

- Practical storage of TePe's interdental brushes in the dental practice.
- 8 removable trays for IDB Original and Extra Soft, and 4 trays for TePe Angle. Each tray holds 15 brushes.
- A useful information chart with brush sizes comes with the box.

TePe® Travel Case

- Practical travel case for TePe® Interdental Brush, TePe Mini Flosser™ or TePe EasyPick™.
- Air holes to allow bristles to dry.
- For hygienic storage during travel.

High-quality, well-designed, effective and yet gentle for removing plaque. There is a lot that can be said about TePe's toothbrushes. Various models, sizes, bristles and colours facilitate daily oral care for people of all ages, in a user-friendly way.

2 Toothbrushes

TePe Select™ Regular

Size: Regular

Bristles: Extra soft, soft & medium

- Tapered brush head for easy access.
- End-rounded bristles for gentle and effective cleaning.
- User-friendly handle design.
- Made with renewable materials through the mass balance approach.¹

TePe Select™ Compact

Size: Compact

Bristles: Extra soft, soft & medium

- Small, tapered brush head for easy access.
- End-rounded bristles for gentle and effective cleaning.
- Suitable for children and adults who prefer a smaller brush head.
- Made with renewable materials through the mass balance approach.¹

TePe Colour™

Size: Regular

Bristles: Soft

- Tapered brush head for easy access.
- End-rounded bristles for gentle and effective cleaning.
- User-friendly handle design.
- Made with renewable materials through the mass balance approach.¹

TePe Colour™ Compact

Size: Compact

Bristles: Extra soft

- Small, tapered brush head for easy access.
- End-rounded bristles for gentle and effective cleaning.
- Suitable for children or for adults who prefer a smaller brush head.
- Made with renewable materials through the mass balance approach.¹

Imprinting service

Personalise your toothbrush with TePe's imprinting service – an excellent marketing opportunity for dental practices. All TePe toothbrushes are now made with renewable materials.

Logotypes, images and messages can be printed on our Select, Select Compact, Colour, Colour Compact and Mini toothbrushes. Choose between a variety of different handle colours and print colours for amazing designs.

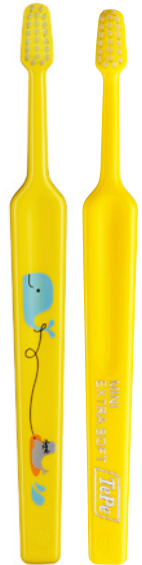

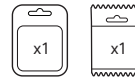

TePe Mini™

Size: Mini

Bristles: Extra soft & soft

- Recommended from the first tooth.
- Extra small, tapered brush head and end-rounded bristles for gentle and effective cleaning.
- Available with or without charming prints created by Swedish Isa Form.
- Made with renewable materials through the mass balance approach.¹

TePe Kids™

Size: Compact

Bristles: Extra soft & soft

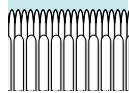

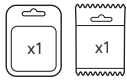

- Toothbrush with colourful print, suitable from the age of 3 years.
- Small, tapered brush head for easy access.
- End-rounded bristles for gentle and effective cleaning.
- Made with renewable materials through the mass balance approach.¹

TePe Supreme™

Size: Regular
Bristles: Soft

- Unique two-level bristle design for excellent reach.
- Easy-grip handle with thumb pad for extra comfort.
- Made with renewable materials through the mass balance approach.¹

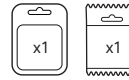

Two levels for improved access between and around teeth.

TePe Supreme™ Compact

Size: Compact
Bristles: Soft

- Unique two-level bristle design for excellent reach and easy-grip handle with thumb pad.
- Suitable for children or for adults who prefer a smaller brush head.
- Made with renewable materials through the mass balance approach.¹

Improved access

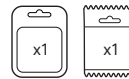

For even better access, the neck of TePe's toothbrushes can be angled. Heat in warm water, bend, and cool in cold water.

TePe Nova™

Size: Regular
Bristles: Extra soft (pink), soft (yellow) & medium (blue)

- Long brush tip and end-rounded bristles for effective and gentle cleaning.
- Easy-grip handle with thumb pad for extra comfort.
- Made with renewable materials through the mass balance approach.¹

Longer tip for improved access to back teeth.

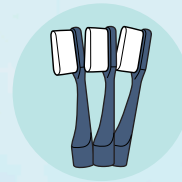

TePe Choice™

Size: Regular
Bristles: Soft

- Soft, end-rounded bristles for gentle and effective cleaning.
- Tapered brush head for easy access.
- Made from renewable materials lowering the carbon footprint.
- Plant-based coating on the handle to minimise moisture absorption.

One reusable handle.

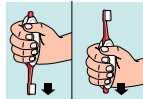

Each pack includes three replaceable brush heads.

TePe® Extra Grip

- Provides a comfortable, stable grip which helps patients with reduced manual dexterity.
- Fits all of our toothbrushes except Supreme, Nova and Choice.
- Easy to insert and remove by tapping the toothbrush handle on a hard surface.
- Made with renewable materials through the mass balance approach.¹
- Weighs only 30 grams.

Insert/remove the brush by tapping the handle against a table.

TePe® Brush Head Cap

- Small, practical travel cap.
- Air-holes ensure quick drying of the brush.
- Suits all TePe toothbrushes and special brushes (except the Denture Brush).
- Made with renewable materials through the mass balance approach.¹

Renewable materials matters

The choice of raw materials has a significant impact on the carbon footprint of a product.

By replacing fossil materials with carefully selected renewable raw materials, and using only renewable energy in production, we take important steps towards lowering the carbon footprint of our products and packaging.

Wisdom teeth, dental implants,
or braces – no matter your needs,
TePe can help make cleaning
easier. TePe offers a wide range
of high-quality cleaning devices
with excellent functionality
for those with specific oral
hygiene needs.

3

Specialty products

TePe Compact Tuft™

- Optimal for precision cleaning.
- Dome-shaped brush head with dense, rounded tuft.
- Ideal for cleaning along the gum line, on the occlusal surfaces of emerging teeth, or impacted wisdom teeth.
- Made with renewable materials through the mass balance approach.¹

TePe Universal Care™

- A unique angle provides easy access to the lingual and palatal surfaces of teeth and implants.
- Facilitates cleaning in narrow and hard-to-reach areas.
- End-rounded bristles for gentle cleaning.
- Made with renewable materials through the mass balance approach.¹

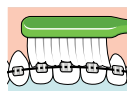

The angled neck facilitates cleaning of lingual surfaces.

TePe® Implant Orthodontic Brush

- Extra slim brush head for improved access.
- Optimal for cleaning buccal implant surfaces or orthodontic appliances.
- Long and thin neck for better access.
- Made with renewable materials through the mass balance approach.¹

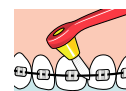

Effective cleaning around brackets and wire.

TePe Interspace™

Bristles: Soft (yellow) & medium (blue)

- Ideal for cleaning furcations, implants, fixed braces or behind the last tooth.
- Brush tip can be attached to either side of the handle.
- Comes with 12 replaceable brush tips.
- Made with renewable materials through the mass balance approach.¹

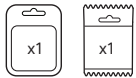

TePe Special Care™

Size: Regular (red) & Compact (blue)

Bristles: Ultra soft

- 12,000 (Regular) and 9,000 (Compact) ultra soft bristles for delicate cleaning.
- First brush stage after oral surgery.*
- For patients with extremely sore and delicate tissues, e.g. as a result of trauma, radiotherapy treatment or after oral surgery.
- Made with renewable materials through the mass balance approach.¹

* A dental professional should always be consulted regarding brushing after oral surgery.

TePe Gentle Care™

Size: Regular

Bristles: Super soft

- Super soft filaments for gentle cleaning.
- Second brush stage after oral surgery.*
- For patients with dry mouth, sensitive root surfaces or sensitive oral tissues.
- Made with renewable materials through the mass balance approach.¹

TePe® Denture Care

Size: Regular

- Effective and safe cleaning of removable dentures.
- Brush head can be bent backwards for improved grip and accessibility.
- Designed to resemble a regular toothbrush.
- Made with renewable materials through the mass balance approach.¹

Long, strong filaments for efficient cleaning of dentures.

TePe® Tongue Cleaner

- Three blades for a triple cleaning effect.
- Helps prevent bad breath (halitosis).
- Removes bacteria in a few strokes.
- Made with renewable materials through the mass balance approach.¹

TePe® Dental Model

- For patient demonstration and instruction.
- Shows crowding, various interdental spaces, furcation, an erupting wisdom tooth and tooth loss.
- Can be marked with a non-permanent pen for instructional use.

Delivered in a brown hard paper box.

Sustainable packaging matters

Shifting to renewable or recycled materials is a priority. Today, we use FSC branded paper and recycled cardboard, and the majority of our plastic packaging is made from either partly recycled or renewable materials. All packaging is 100% recyclable.

Healthy smiles for all mouths

On this page, you will find recommendations of products for daily oral care for everyone, from the first baby tooth to special needs like oral care for braces and implants.

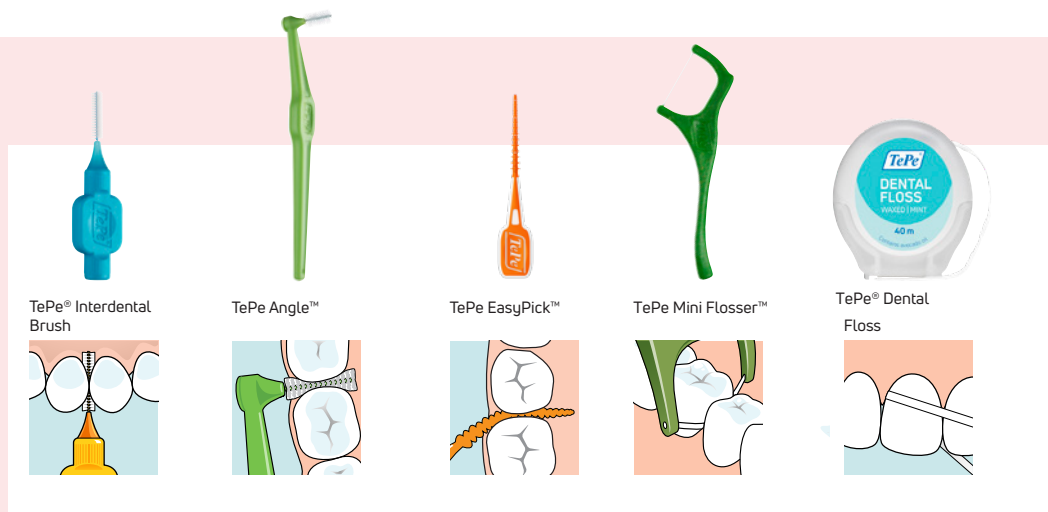

Paedodontic care

In order to promote a healthy mouth throughout life, we recommend to start brushing when the first tooth emerges. Interdental cleaning is often recommended from the teenage years onwards.

Daily care

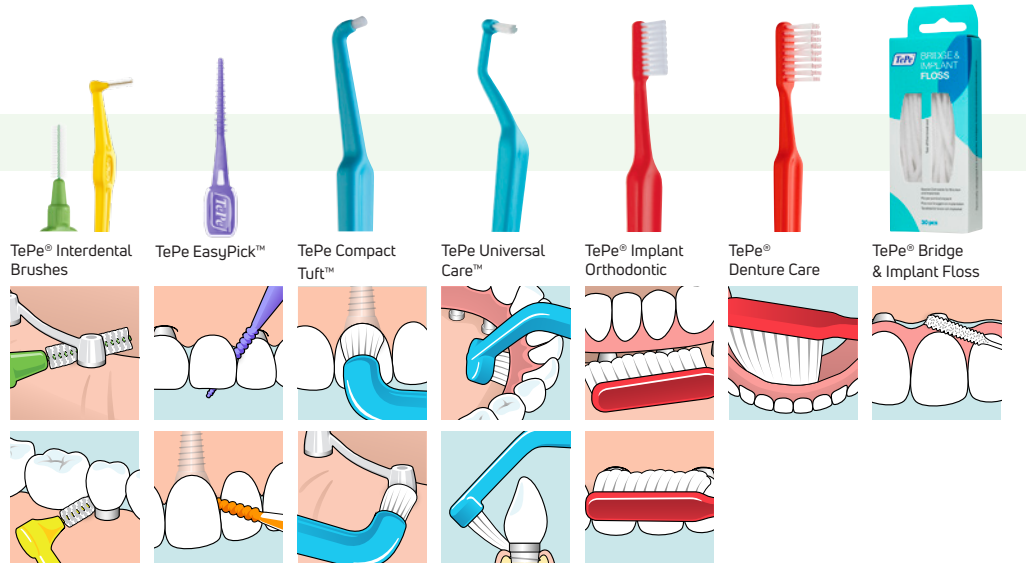

The basis for maintaining healthy gums is daily interdental cleaning and tooth-brushing. Professionals have a key role in motivating the patient and recommending the proper products.

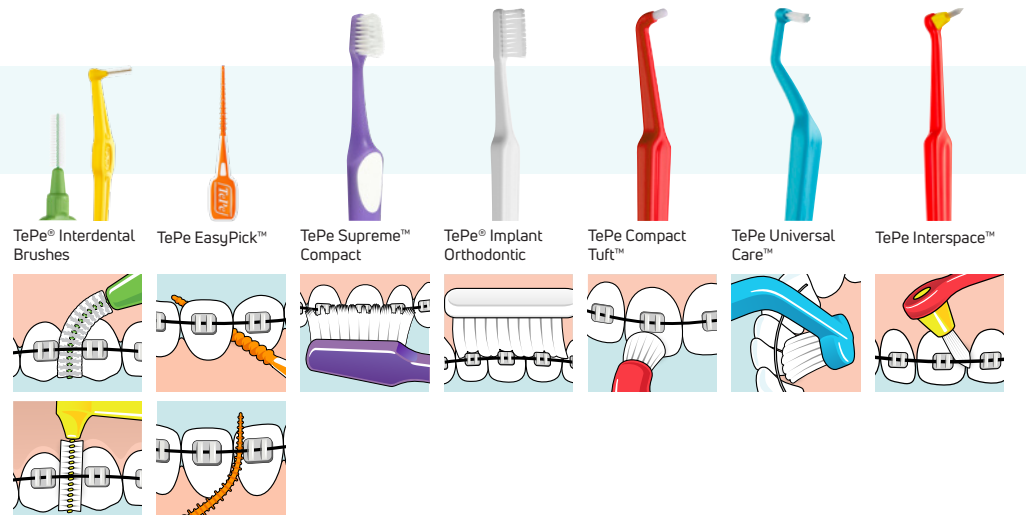

Implant care

Professional guidance on suitable products and cleaning techniques is important to prevent the development of peri-implant mucositis and peri-implantitis.

Orthodontic care

Fixed orthodontic appliances can lead to a quick build-up of plaque around brackets, bands, and wires. Systematic self-care routines are needed to prevent gingivitis and caries.

We share a passion for knowledge

Caring about people's health means that we keep developing solutions for long-term well-being and a better quality of life. The growing scientific support for the link between oral and general health makes creating positive change more relevant than ever. That is why education and awareness is so important.
