## TePe Product Guide

# TePe Product Guide

This guide will identify areas of use for each of TePe's products.  
There is a solution for all your patient's needs.

## Children

- Small mouth
- Mixed Dentition
- May need assistance

## Healthy Smiles

- Established oral hygiene routine
- Pointed papilla that fills the interdental space
- Type 1 Embrasure Space

## Aging Population

- Mix of natural and prosthetic teeth
- May have reduced grip strength or dexterity
- May have oral-systemic conditions

## Periodontal Care

- Reduced periodontium
- More exposed tooth anatomy
- Hard-to-reach areas

## Implant, Bridges & Crowns

- Needs products that are safe to use
- Advanced solutions for the many different types of restorations
- Hard-to-reach areas

## Orthodontic Care

- Shifting of teeth
- Challenging to clean around orthodontic brackets & appliances
- Convenience and ease of use is key

# Between the Teeth Cleaning

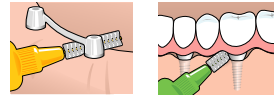

## TePe® Interdental Brush Original

- Daily use can remove up to 40% more plaque than toothbrushing alone.
- Available in all 9 sizes to meet all interdental embrasure spaces.

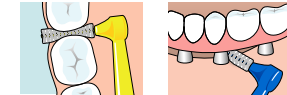

## TePe® Interdental Brush Extra Soft

- Extra soft bristles make this brush ideal for use around delicate oral tissue.
- Available in 6 sizes, orange through purple.

## TePe® Angle

- Angled brush head creates easier access, especially between the posterior teeth.
- Available in 6 sizes, pink through green.

## TePe EasyPick™

- Silicone coating makes it comfortable to use and stimulates gingival tissue.
- One shape, being both durable and flexible to reach all areas of the mouth.

## TePe GOOD Mini Flosser™

- Pre-loaded dental floss holder with a unique designed bite plane that helps to gently insert the floss between teeth.

## TePe® Bridge and Implant Floss

- A spongy floss with two stiff plastic ends make the floss easy to grip and insert.
- Available in 30 pieces/box or 5 pieces/box (samples)

## TePe® Dental Tape

- Wide, flat, and naturally waxed floss with a fresh mint flavor.

# TePe Specialty Brushes and Accessories

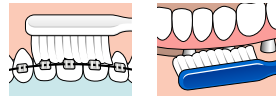

## TePe Universal Care™

- A flat brush design with a contra-angled neck provides easy access to the lingual and palatal surfaces of teeth, implants, and under prosthetics.

## TePe® Implant Orthodontic Brush

- Extra slim brush with two rows of bristles.
- Designed to clean above and below fixed braces and the buccal side of implants.

## TePe Compact Tuft™

- Dome-shaped brush with densely packed bristles giving a firm feel.
- Ideal for implants, attachments for overdentures, fixed braces, stain removal, and partially erupted teeth.

## TePe Interspace™

- A pointed brush tip and includes 12 removable brush heads
- Ideal for cleaning behind the last tooth, furcations, implants, fixed braces or any hard-to-reach areas.

## TePe Gentle Care™

- TePe Gentle Care™ is slightly firmer than TePe Special Care™.
- Super soft toothbrush recommended for patients with sore or very delicate oral tissue, very sensitive root surfaces, and extremely dry mouth.

## TePe Special Care™ & TePe Special Care™ Compact

- Ultra-soft bristles for a delicate cleaning after oral surgery or anywhere there is fragile tissue.
- Available in two brush head sizes, regular or compact.

## TePe® Denture Care

- Extra-long, strong bristles to ensure good accessibility and efficient cleaning.

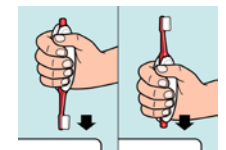

## TePe GOOD™ Tongue Cleaner

- Designed to remove bacteria on the tongue.
- Three blades to give a triple-effect with one stroke and shaped to reduce the gag reflex.

## TePe® Extra Grip

- Provides a stable grip for those with reduced manual dexterity or reduced grip strength. It is dishwasher safe.
- Fits most TePe toothbrushes and specialty brushes.

## Tips for choosing the correct interdental brush size

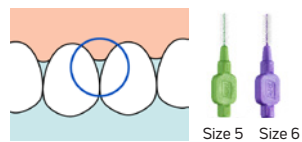

### Extra small / Small gaps

When no gaps are visible, try a pink, orange or red interdental brush. If you are uncertain, choose the smaller size.

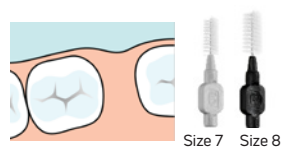

### Medium gaps

When gaps are visible and allow food to get stuck, a blue or yellow interdental brush is often a good choice.

### Large gaps

For clearly visible gaps where food often gets stuck, try a green or purple interdental brush.

### Extra large gaps

If a tooth is missing, choose a grey or black interdental brush.

## Quick Tips for Using Interdental Brushes

- There will be some resistance from the bristles.
- Do not force a brush into a space.
