

CERT-A-LIFT VII®

SAFE OVERHEAD PALLET
LIFTING

Is Your Workload Weighing You Down?
Let LHR Give You A Lift!

Safety Is Our Business

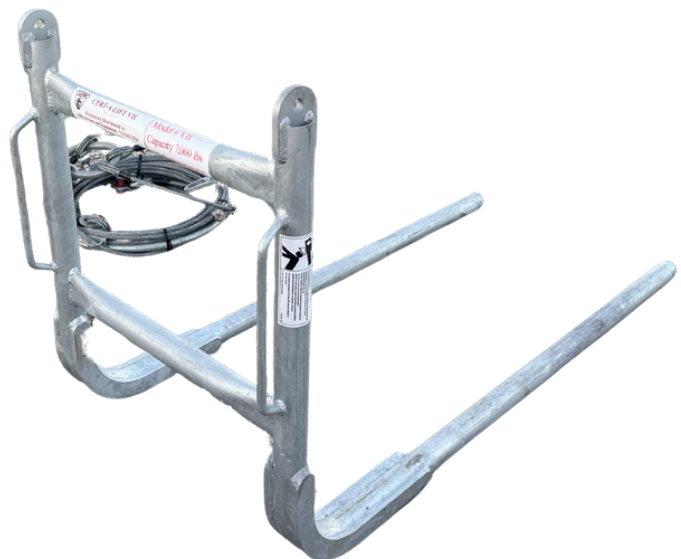

The Cert-A-Lift VII® from LHR provides for the safe moving of palletized loads via crane.

The Cert-A-Lift VII® converts your overhead crane into a forklift vehicle, allowing pallets of material to be moved throughout a worksite where traditional forklift trucks or cranes may not have access.

Specially Designed

The Cert-A-Lift VII® is specially designed for lifting palletized loads.

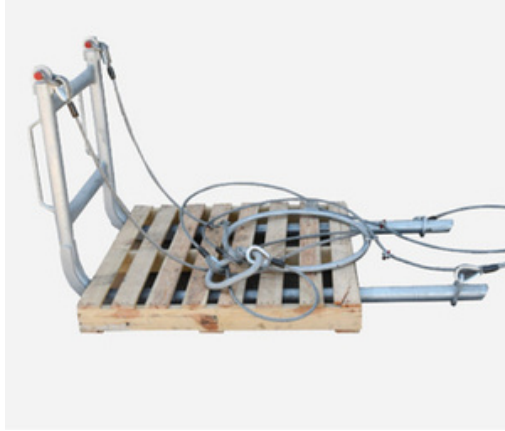

The four-point lifting sling allows for an evenly distributed and balanced load. The quick release lugs permit easy hook-up. A floating low profile spreader ring reduces cable windage.

CERT-A-LIFT VII[®]

SAFE OVERHEAD PALLET
LIFTING

Ready To Ship *Pallet not Included

Easy Hook Up Secure locks hold in place

Four Point Lifting

Floating low profile gives even distribution of weight.

Safety In Mind

Built-in positioning handles ensure hand safety and easy maneuverability.
