

Multi-Grab V

No Batteries? No Power? No Problem!
This Magnet is a Powerhouse!

**Multi-Grab V Magnetic Hand
Safety Tool ON/OFF Switch**

Safety Is Our Business

The Multi-Grab V is a versatile On - Off Magnetic Tool for Material Handling, Holding, Positioning, Lifting and Suspended Load Control.

The Multi-Grab V is a multi-purpose, multi-use magnetic no touch safety tool with many uses and applications. It is a perfect choice for steel fabrication shops, steel mills, machine shops, manufacturing and many other industries.

Specially Designed

MULTI-GRAB V is the go to material handling, positioning, holding, lifting and carrying magnet with an On/Off switch to magnetize and de-magnetize instantly with no batteries or electricity!

When turned off, there is virtually zero magnetic flux or magnetic field, place the magnet on steel and turn it on to get approximately 380 LBS of magnetic holding power! A super durable and ergonomic pivoting handle can be locked in a push/pull material handling position as well as a vertical lift/carry position.

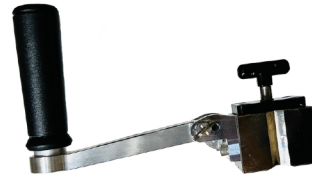

This gives the user lots of flexibility when performing various operations. They are lightweight and compact so they will go and fit just about anywhere.

We do not recommended lifting more than 40 LBS by human power for safety reasons. MULTI-GRAB V tools are industrial grade magnetic hand safety tools ready for the challenging work you do, the possibilities are endless.

Multi-Grab V

Multi-Grab V Magnetic Hand Safety Tool ON/OFF Switch

Features and Benefits

- Strong, durable and easy to use
- Lightweight, compact and super tough
- Magnet can be turned On and Off
- 2 position locking handle for push/pull and lift/carry
- "V" grooves on 3 magnetic lifting surfaces for steel rod and rounds
- Produces approximately 380 LBS of magnetic grip force
- Keep fingers and hands away from dangerous pinch or crush points
- Precision CNC aluminium manufacturing
- Easy to attach almost anywhere
- Costs way less than an accident or ER visit
- Assembled in U.S.A.

Uses

- Move, position and lift steel parts, pieces and assemblies
- Suspended load control operations
- Move and position steel sheet metal
- Lift and carry steel parts and pieces
- Lift and pull up small steel covers and lids
- Position and hold steel parts for welding or assembly
- Grab, drag and carry steel parts and pieces
- Use in laser cutting, plasma cutting and water jetting operations
- Use in steel manufacturing and fabrication operations
- Use in steel building and structure fabrication and construction
- Do not lift more than 40 LBS (18 KG)
