LHR TETHERED TOOLS KIT

Same Great Quality in One New Simplified Kit

Is Your Workload Weighing You Down?

Let LHR Give You A Hand!

LHR'S TetherIt Tool Kit Gives You 100% Tie-Off, 100% Of The Time

Never compromise again. When working at heights, what goes up, must NOT come down. Introducing LHR Safety's TetherIt Tool Kit, the industry's ONLY permanently tethered, comprehensive tool kit featuring dual tethering, for 100% tie-off..

Dropped Object Prevention

Struck by object incidents account for 32.5% of injuries and days away from work in the drilling industry.

When we say 100%, we mean it. The TetherIt Tool Kit combines dual triple-action carabineer tether points that works in conjunction with our specially designed tool hoisting strap to give workers at least two tie-off points at all times.

If your crew is still using a single point, make-shift tether tool and they untether to switch hands or move the tool to another position, it's just like not using a tethered tool. Now we can't stop gravity from happening, but we can reduce its effects.
