Don't Tangled Up In Your Work

TANGLE - RESISTANT COATED
TAGLINES

Safety Is Our Business

LHR's tangle-resistant coated taglines are specifically designed to be a safe alternative to traditional rope taglines. Traditional rope taglines can easily become tangled or wrapped around a person's leg or other surrounding object as the crane is lifting the load causing a potentially hazardous condition to personnel and damage to equipment.

Specially Designed

Traditional rope taglines can also become saturated with liquids and oils making them slippery and reducing grip. LHR's tangle-resistant coated taglines are designed to mitigate all of these hazards. The coated end of the tag lines provides rigidity preventing entanglement with personnel and other objects while also providing better grip for better control.
