Mullion, Straight

Mullion Install

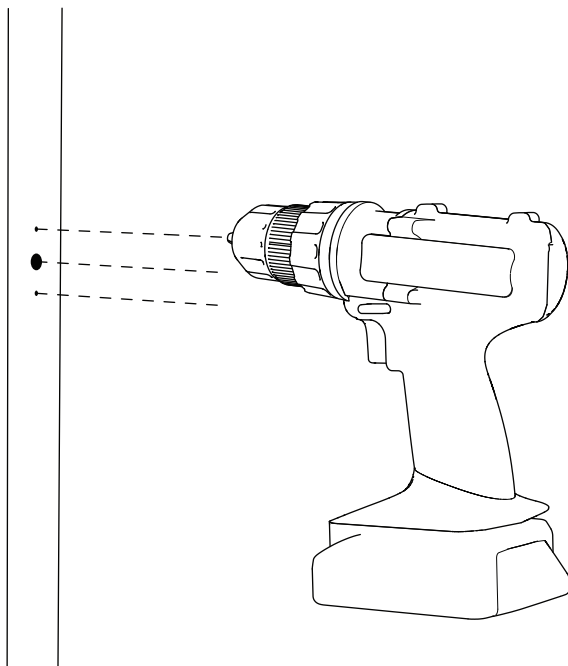

1 Disassemble Multi Mount

ⓘ Loosen, do not remove.

2 Mark mounting hole positions

3 Drill mounting + Ethernet cable holes

Screw Selection: You may use any screw you see fit for mounting the product to the mullion.

If you choose to use the self-tapping mounting screws provided, we recommend drilling a pilot hole with a #17 drill bit or a 5/32-inch drill bit.

Ethernet Cable hole: If your Ethernet cable has an RJ45 connector installed, drill a 5/8 inch hole in the position shown. Consider using a step drill bit to drill these larger holes.
If you will install an RJ45 connector after the Ethernet cable is drawn through the mullion, a smaller hole can be created.
4   Form mounting hole threads

F486
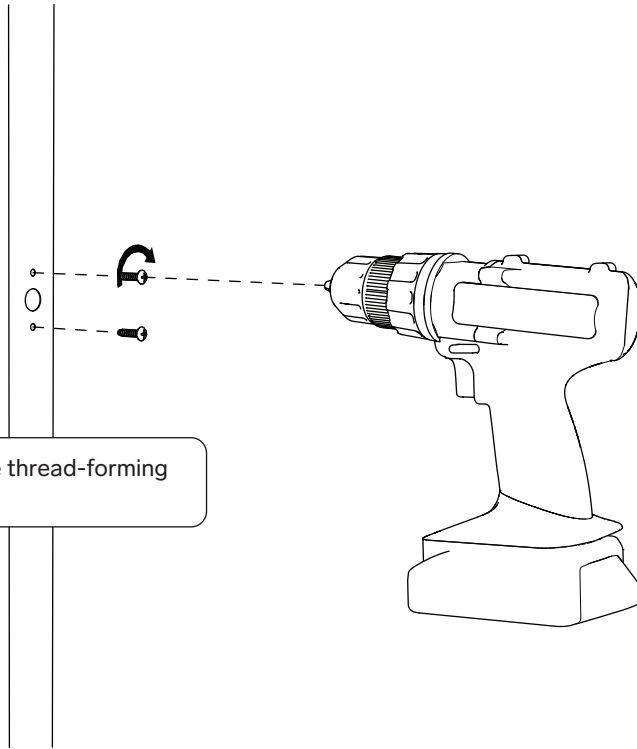

The mounting screws provided are thread-forming screws.

# 5   Remove mounting screws and route Ethernet cable
